"Albert makes a deeper and more sensitive investigation into what love is than most romances." —New York Times Book Review on *Conventionally Yours* Winning and losing are subject to sexy interpretation... Navy chief Calder Euler loves to win big. His latest score? A remote mountain cabin. Checking it out is supposed to be a quick trip, but Calder ' s luck abruptly turns when a freak injury and a freakier snowstorm leave him stranded. Oh, and the cabin isn ' t empty. A silver fox caring for two young girls claims that the property is his, but Calder ' s paperwork says otherwise. Felix Sigurd is on a losing streak, and his ex-husband risking the cabin in a reckless bet is only the latest in a series of misfortunes. He ' ll tolerate the handsome stranger for a couple nights--even care for his injuries—but that ' s it. Calder doesn ' t know a damn thing about kids,

but making pancakes for Felix ' s girls is a surprising delight. Trapped in the cabin, the four of them slip easily into the rhythms of a family. But when the ice melts, they ' ll have to decide if a future together is in the cards. Carina Adores is home to romantic love stories where LGBTQ+ characters find their happily-ever-afters. Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of

engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.

The Triumph 350cc and 500cc unit-construction twins were called the 'C' Series, and were made between 1957 and 1974. The range started with the 350cc 'Twenty-one' - a sedate touring bike with full enclosure in the form of the famous Triumph 'Bathtub' - went through such famous names as the Speed Twin, Tiger 100 and Trophy, and ended with the rip-roaring Daytona and the off-road Adventurer. This book deals with the whole range, giving the history of all the models, and also describes the restoration of a 1969 Trophy T100C.

Like many of us, Mark Hertsgaard has long worried about the declining health of our environment. But in 1991, he decided to act on his concern and investigate

---

the escalating crisis for himself. Traveling on his own dime, he embarked on an odyssey lasting most of the decade and spanning nineteen countries. Now, in *Earth Odyssey*, he reports on our environmental predicament through the eyes of the people who live it. From the gilded boardrooms of Paris to the traffic-clogged streets of Bangkok, we travel from the deep human past to our still unfolding future. Much of the story revolves around people like Zhenbing, Hertsgaard's charismatic interpreter in China, whose desire to escape poverty leaves him indifferent to his country's horrific air and water pollution. We also meet Garang, a proud Dinka tribesman whose response to Sudan's famine shows the difficulty of building an environmentally sustainable future without bridging the gap between rich and poor. Drawing on interviews with Václav Havel, Al Gore, Jacques Cousteau, and numerous other prominent figures, Hertsgaard offers fresh insight into such complex issues as humanity's growing addiction to the automobile, the insidious spread of nuclear technology, and the inevitable tension between unfettered capitalism and the health of the biosphere. *Earth Odyssey* is a vivid, passionate narrative about one man's journey around the world in search of the answer to the most important question of our time: Is the future of the human species at risk? Combining first-rate reportage with irresistible storytelling, Mark Hertsgaard has written an essential--and ultimately hopeful--book about the uncertain fate of humankind.

An award-winning scientist offers his unorthodox approach to childrearing:

“ *Parentology* is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions ” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural

traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
