The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

If you discovered a new market comprising 53% of the world's population, would you act to invest in it? There are 1.3 billion people around the world who identify as having a disability. When you include friends and family, the disability market touches 53% of all consumers. It is the world's largest emerging market. Unleash Different illustrates how companies like Google, PepsiCo, and Nordstrom are attracting people with disabilities as customers and as employees. Replacing "nice to do" with "return on investment" allows market forces to take over and the world's leading brands to do what they do best: serve a market segment - in this case, the disability market. Business managers will come to understand how taking a charity-oriented approach to people with disabilities has failed, what action is required to capitalize on the world's biggest emerging market, and how their organizations can grow revenue and cut costs by attracting people with disabilities as customers and talent. Rich gives the reader a peek into how he rose from a Canadian school for "crippled children" to manage \$6 billion for one of Wall Street's leading firms. He makes it easy to relate to the business goal of serving disability - because he has actually done it.
