series of rockets fulfilled plans developed in the late 1950s to build a rocket which could triple the existing thrust levels of US rockets and equal the lifting capacity of the Soviet Union, launching satellites and spacecraft weighing more than 10 tonnes into Earth orbit and do it by the early 1960s. These rockets emerged from the work carried out by former V-2 technical director Wernher von Braun, working at the Army Ballistic Missile Agency in Huntsville, Alabama. Three times more powerful than anything launched by

America to that date, 1964, the first with a cluster of eight rocket motors for the first stage, the first Saturn I flew on October 27, 1961, and propelled America into the heavy-lift business. It was the Saturn I, and its successor the Saturn IB, with a more powerful second stage, that did all the preparatory work getting NASA ready to put men on the Moon. Between 1961 and 1975, the 19 flights of the Saturn I and IB achieved several historic “firsts”, launching the world’s first high-energy liquid oxygen/liquid hydrogen upper stages into orbit in

unmanned test of suborbital and orbital Apollo spacecraft in 1966, the first unmanned test of the Lunar Module in 1968, the first manned Apollo spacecraft Apollo 7 also in 1968, all three Skylab flights in 1973 and the last Apollo spacecraft flown in support of the Apollo-Soyuz Test Project in 1975.

<p>Happy is the first book ever written about Saturns by a factory trained master technician. This book is a cross between the owner's manual and what your brother or friend would tell you if he were a Saturn technician. The information in this book is the result of over ten years experience working on Saturns, and could save you from spending hundreds or possibly thousands of dollars on avoidable and unnecessary major repairs. A thorough</p>	<p>explanation of basic maintenance procedures and a used car guide are also included in a non-technical, easy-to-read format. Reviews from experts "A well written guide by an expert on how to keep your Saturn "on the road" for years of dependable service" Bob Stubeck, Sales Associate- Saturn of Sarasota "Easy reading, not too technical, A must read for all Saturn owners... Dave Wiegand, Service Manager- Saturn of Sarasota "You can tell this guy has spent years</p>	<p>with these cars, he really knows his stuff- this is a valuable book for any car owner, not just for Saturns." Bob Pfaff, Service Manager- Saturn of Sunrise "This is an inside look at what we as technicians feel is necessary for an informed customer to know about caring for their Saturn- I believe this book would be a very helpful guide to prolonging the life of any vehicle, at a minimal cost" Rick May, Senior Master Technician- Saturn of Sarasota <u>Toyota/Lexus</u></p>
