The White Lions of Timbavati  
Cengage Learning  
The time has come to  
chronicle a photo archival  
book of Drag Boats of the  
1960s aptly named “ The  
Rebel Decade. ” This was the  
birth of “ whip-start ”  
dragsters which led to today's  
organized drag boat racing.  
Recognized and featured are  
those racing legends like Larry  
Schwabland, Ray Caselli,  
Gary Gabelich, Dwight Bale,  
hot boat builders like Rich  
Hallett, “ Sanger Jack ”  
Davidson, Rudy Raymos,  
engine builders Keith Black,  
Dave Zeuschel, Ed Pink, Louis  
Unser and many others who  
reigned in their heyday. These  
mavericks dared to mix  
unleashed speed-on-the-water  
with smoke and fire,  
thunderous nitro or powerful  
blown gas while avoiding the  
moment when their boat could  
take a deadly spin, nose dive  
or flight—many failed. Drag

Written by a team of  
renowned contributors and  
carefully edited to address the  
themes laid out by the editors  
in their introduction, the book  
includes theoretical issues  
concerning the questions of  
aesthetics and politics and  
addresses city and urban

critique of the "post-political".  
By focusing on specific case  
studies from Warsaw,  
Barcelona, Dubai, Tokyo and  
many more the book  
consolidates the contributions  
of a diverse group of  
academics, architects and  
critics from Europe, the

This collection fills the gap in

implications for the theoretical discourse of architecture today. In summary, this book provides a response to the predominant de-politicization in academic discourse and is an attempt to re-claim the abandoned critical project in architecture.

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer ' s personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical

principles of various material handling systems;

- considerations in selecting technically efficient and environmentally friendly equipment;
- best practices in upgrading and optimizing existing bulk material handling facilities;
- strategies to select proper equipment in the early phases of a new project.

Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

### The Boat Repair

Manual Robert Bentley, Incorporated

On the cover of this book is a Pacific yew tree, found in the ancient forests of the Pacific Northwest. The

bark of the Pacific yew tree produces Taxol, found to be a highly effective drug against ovarian and breast cancer. Taxol blocks mitosis during eukaryotic cell division. The supply of Taxol from the Pacific yew tree is vanishingly small, however. A single 100-year-old tree provides only about one dose of the drug (roughly 300 mg). For this reason, as well as the spectacular molecular architecture of Taxol, synthetic organic chemists fiercely undertook efforts to synthesize it. Five total syntheses of Taxol have thus far been reported. Now, a combination of isolation of a related metabolite

from European yew needles, and synthesis of Taxol from that intermediate, supply the clinical demand. This case clearly demonstrates the importance of synthesis and the use of organic chemistry. It's just one of the many examples used in the text that will spark the interest of students and get them involved in the study of organic chemistry!
