During 1986 there were

technology was forced to undergo an almost complete re-start and it took some time before more than just one or two manufacturers could produce a winner. When they did, the side-effect was astounding with thousands of four-wheel drive, turbocharged road cars coming onto the global market. The new McKlein book, Group A: When Rallying created Road Car Icons, covers the ten years from 1987 to 1996 when Group A went from featuring fairly unexciting road cars to exotic, hi-tech rally cars whose performance was not much

less than their predecessors. As well as an overview of the major events, the leading cars and crews, the factory teams, the changes of regulations--both technical and sporting--as well as results of all the major events and the championships associated with them, the books are lavishly illustrated with photographs from the famous McKlein archive. In addition, there are many stories of incidents and occurrences that give the reader an insight into just what rallying was like during the period covered

and how Lancia, Ford, Toyota, Subaru and Mitsubishi fought for the WRC title. Mergent International Manual Haynes Manuals N.
