An award-winning scientist offers his unorthodox approach to childrearing:

“Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the*

*Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from

bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with

---

kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

The Car Book 1999 Dundurn Toyota's spectacular performance in the competitive and mature auto industry has been attributed to many factors. They are: Toyota's corporate culture, Kaizen philosophy of continuous improvement, Kanban and Just-In-Time (JIT) production systems, zero defect goal, a lean production system, fast product cycle, ringi or consensus bottom-up decision making, pursuit of highest customer satisfaction, and high

quality products. This research suggests that although all these measures contributed to the outstanding performances of Toyota over the decades, the real driver of Toyota's decisions and actions is Toyota's purpose. The study concludes that Toyota is driven by corporate purpose. At Toyota, purpose is clearly understood and internalized by its senior management. The ideologies embodied in purpose provide a strong and unifying mechanism that stimulates the energies and efforts of its employees, and provides a moral compass to attain that meaningful, value-

laden purpose of the organization. Toyota's purpose is crafted in its stakeholders power structure, its environment, and its cultural values and assumptions. Toyota's purpose is to be a well-balanced global corporation that is a contributing member of the local communities. It strives to attain this by taking care of its employees, suppliers, and local communities, and by improving the quality of life of people in these communities. The main drivers behind Toyota's strategic key decisions are pursuit of harmonious growth and enhancement of

profitability. Toyota's strategic decisions are linked through its key objectives to its operative purpose, which also is its stated purpose.
