The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain

designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less,

emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be

This volume
is about
Pope
Francis, the
diplomat. In
his eight
years of
pontificate,
Pope Francis
as a
peacemaker
has
propagated
the ideas of

human and divine cooperation to build a global human fraternity through his journeys outside the Vatican. This book discusses his endeavours to connect and develop a common peaceful international order between countries, faith communities, and even antagonistic communities through a

peaceful journey of human beings. The book analyses his speeches, and meetings as a diplomat of peace, including his visits to Cuba and the United States, and his mediations for peace in Colombia, Myanmar, Kenya, Egypt, Turkey, Jordan, Jerusalem, the Central African

Republic, Sri Lanka, and Bangladesh. It discusses the role of Pope Francis as mediator in different circumstances through his own writings, letters, and Vatican documents; his encounters with world leaders; as well as his contributions to a universal understanding on inter-faith dialogue, climate

change and the environment, and human migration and the refugee crisis. The volume also sheds light on his ideas on a post-pandemic just social order, as summarised in his 2020 encyclical. A definitive work on the diplomacy and the travels of Pope Francis, this volume will be of great

interest to scholars and researchers of religious studies, peace and conflict studies, ethics and philosophy, and political science and international relations. It will be of great interest to the general reader as well.

This all-new fourth edition of the most popular motorcycle touring guide to New England offers more suggested routes than ever, along with fully updated listings of motorcycle-friendly lodgings and great out-of-the-way restaurants. Motojournalist Ken Aiken leads two-wheeled travelers

through twisty mountain passes and beautiful valley backroads to scenic, intriguing destinations in six key regions: the rugged Maine coast, the high notches of New Hampshire's White Mountains, the lush gaps of the Green Mountains of Vermont, the Champlain region between

upstate New York and Vermont, the rolling Berkshire hills of Massachusetts, and the coastal delights of Rhode Island and Connecticut. Aiken covers well-known motorcycle-touring roads like Vermont's Route 100, the Mohawk Trail, and the Kancamagus Highway, but his inclusion of little known regional roads frequented by local riders sets this guide apart from others. Altogether, Aiken has carefully plotted 28 trips for motorcyclists, most of them taking one day to complete. Multi-day tours can easily be created by linking adjacent trips. Each trip includes a detailed map and specific route directions. The trips are designed to accommodate various riding styles and audiences, from sightseeing two-up travelers to sport riders bending the curves.
