Just as the Beetle started a long
tradition of Volkswagen
automotive excellence, these are
the manuals that created the
Bentley reputation for clarity,
thoroughness, and
indispensability. Our air-cooled
Volkswagen manuals provide
both do-it-yourself owners and
professional mechanics with clear
explanations and illustrations,
detailed service steps, and time-
saving troubleshooting tips. In the
same tradition as our classic
1961-1965 Type 1 manual, this
manual offers owners of 1960s
vintage Transporters the long out-
of-print factory repair
information. Indispensable to
anyone interested in the history or
restoration of the Transporter, this
book includes complete coverage
of 1200 and 1500 engines, dual-

Electrical issues in
European cars can be
intimidating. The Hack
Mechanic Guide to
European Automotive
Electrical Systems shows
you how to think about
electricity in your car and
then take on real-world
electrical problems. The
principles discussed can be
applied to most
conventional internal-
combustion-engined
vehicles, with a focus on
European cars spanning the
past six decades. Drawing
on The Hack Mechanic's
wisdom and experience, the
38 chapters cover key
electrical topics such as
battery, starter, alternator,
ignition, circuits, and
relays. Through a practical
and informal approach

featuring hundreds of full-color illustrations, author Rob Siegel takes the fear-factor out of projects like making wire repairs, measuring voltage drops, or figuring out if you have a bad fuel pump relay. Essential tools such as multimeters (DVOM), oscilloscopes, and scan tools are discussed, with special attention given to the automotive multimeter needed to troubleshoot many modern sensors. You'll get step-by-step troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed sensors, fuel pumps, solenoids, and actuators. Reading wiring diagrams and decoding the German DIN standard are also covered. Whether you are a DIY mechanic or a professional technician, The Hack Mechanic Guide to European Automotive Electrical Systems will increase your confidence in tackling automotive electrical problem-solving. This book applies to gasoline and diesel powered internal combustion engine vehicles. Not intended for hybrid or electric vehicles. Four Rings Haynes

An award-winning scientist offers his unorthodox approach to childrearing:

“ Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions ” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you ’ re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to

make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley ’ s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy.

You ' ll be laughing and learning at the same time.
