Today 's global business environments drive companies to be more technology dependent, and to remain competitive, firms need to introduce or adopt a new technology to business. In order to

achieve a successful integration with maximum return on investment, companies need a systematic approach that accommodates a comprehensive course of action of technology integration. Technology Integration to Business – Practical Methods and Case Studies suggests a business-driven holistic approach of technology integration that consists of several steps. First, companies should examine the current state, issues, benefits, and obstacles of technology integration in conjunction with their competitive business strategy and operational capability. Second, firms should investigate new, emerging business technologies as to how those technologies can contribute to improve the business.

Third, with the technology integration needs identified, companies should complete preparatory tasks before actual implementation, such as, business process analysis, technology assessment, technology provider investigation, business case development, and cost-benefit analysis. Fourth, because the nature of technology integration project involves many stakeholders in global locations, firms should use effective project management knowledge from project initiation, through planning, execution, control, to close. Students will learn real-world technology integration processes in industry settings and become more prepared for industrial careers. Practitioners will

find thorough procedures and methods that are useful in practice to improve business performance. Realistic examples for manufacturing, logistics, and supply chain management application domains give the reader practical implications for the methods presented.

fascinating history
of Saab and Lotus
begins with their
humble beginnings
and examines each
model in detail and
looks at why these
unusual marques
came under the GM
Banner. Included is
a penetrating
review of Saab
through to its

unfortunate demise.
Volume Two examines
unique models and
variations of
Chevrolet and Buick
manufactured in the
Southern Hemisphere
and Asia but never
offered in North
America. Daewoo,
Wuling and Baojun
are other Asian
brands covered in
detail. This volume
concludes with
recording the
remarkable early
success of Holden

and its continued
independence
through to today.
Volume Three covers
the smaller
assembly operations
around the world
and the evolution
of GM's export
operations. A brief
history of Isuzu,
Subaru and Suzuki
looks at the three
minority interests
GM held in Asia.
The GM North
