Intellichoice Incorporated

Automotive Automatic

Transmission and Transaxles,
published as part of the CDX

Master Automotive

Technician Series, provides

students with an in-depth

introduction to diagnosing,

repairing, and rebuilding

transmissions of all types.

Utilizing a "strategy-based

diagnostics" approach, this

book helps students master

technical trouble-shooting in

order to address the problem

correctly on the first attempt.

-Outcome focused with clear

objectives, assessments, and

seamless coordination with

task sheets -Introduces

transmission design and

operation, electronic

controls, torque converters,

gears and shafts, reaction and

friction units, and

manufacturer types -Equips

students with tried-and-true

techniques for use with

complex shop problems

-Combines the latest

technology for computer-

controlled transmissions with

traditional skills for hydraulic

transmissions -Filled with

pictures and illustrations that

aid comprehension, as well as

real-world examples that put

theory into practice -Offers

instructors an intuitive,

methodical course structure

and helpful support tools

With complete coverage of

this specialized topic, this

book prepares students for

MAST certification and the

full range of transmission

problems they will encounter

afterward as a technician.

About CDX Master

Automotive Technician Series

Organized around the

principles of outcome-based education, CDX offers a uniquely flexible and in-depth program which aligns learning and assessments into one cohesive and adaptable learning system. Used in conjunction with CDX MAST Online, CDX prepares students for professional success with media-rich integrated solutions. The CDX Automotive MAST Series will cover all eight areas of ASE certification.

Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than

1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the

United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

Rosetta Books
The Complete Book of Ford Mustang, 4th Edition details the development, technical specifications, and history of America's original pony car, now updated to cover cars through the 2021 model year.

Kiplinger's Personal Finance Haynes Manuals N. America, Incorporated
The A-904 and A-727, debuting in 1960 and 1962, respectively, are 3-speed automatic Chrysler TorqueFlite Transmissions. In Mopar circles, they have become synonymous with strength, durability, and performance. In fact, 43 years after its first application,

A-904s were still found through the TorqueFlite in the Jeep lineup! TorqueFlites are known for their dependability, but many have endured a tremendous amount of abuse over 50-plus years when hooked up to V-8 Mopar powerplants. There is little doubt that some of these automatics could be prone to failure, or at least need a thorough rebuild. Tom Hand shares his decades of experience rebuilding TorqueFlite transmissions with chapters dedicated to troubleshooting, disassembly and reassembly, performance modifications, post-installation procedures, and the most thorough source guide offered in print, ever. The author walks you

rebuild with color photos showcasing step-by-step procedures with highly detailed, easy-to-follow text. This book will keep money in your pocket and add experience to your résumé, but more important, it will help you get your Mopar back on the road!

Valiant J Series Service Manual John Wiley & Sons

By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do

something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. Go Like Hell tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an

adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. Go Like Hell transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom.

The Last Open Road

An engaging guide to excelling in today's venture capital arena Beginning in 2005, Brad Feld and Jason Mendelson, managing directors at Foundry Group, wrote a long series of blog posts describing all the parts of a typical venture capital Term Sheet: a document which outlines key financial and other terms of a proposed investment. Since this time, they've seen the series used as the basis for a number of college courses, and have been thanked by thousands of people

who have used the information to gain a better understanding of the venture capital field. Drawn from the past work Feld and Mendelson have written about in their blog and augmented with newer material, *Venture Capital Financings* puts this discipline in perspective and lays out the strategies that allow entrepreneurs to excel in their start-up companies. Page by page, this book discusses all facets of the venture capital fundraising process. Along the way, Feld and Mendelson touch on everything from how valuations are set to what externalities venture capitalists

face that factor into but with this book as entrepreneurs' your guide, you'll businesses. Includes discover what it a breakdown analysis takes to make your of the mechanics of a way through it. How do the rich get

rich? An updated edition of the

"remarkable" New York Times

bestseller, based on two decades of

research (The Washington Post). Most of the truly wealthy in the United States don't live in Beverly Hills or on Park Avenue. They live next door. America's wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don't realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as "rich" are actually a tiny

minority of America's truly wealthy citizens—and behave quite differently than the majority. At the time of its first publication, *The Millionaire Next Door* was a groundbreaking examination of America's rich—exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley—updating the original content in the context of the

financial crash and the twenty-first century. "Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today's earn-and-consume culture." -Library Journal

Chrysler Sebring, Dodge Stratus & Avenger 1995 thru 2006

Incorporated by veteran automakers in 1913, the Chandler Motor Car Company was initially successful in a fiercely competitive industry, manufacturing an array of quality automobiles at a range of prices. Yet by the late 1920s the company was floundering under mismanagement.

Producing four lines of cars with numerous body styles, Chandler and its lower-priced companion marque, Cleveland, were unable to find markets for their numerous models and seemed in effect to be competing against themselves.

Drawing on numerous

automotive histories and two large private collections of memorabilia, this exhaustive study of the Chandler Motor Car Company covers the automobiles in detail, including all body styles, and their changes during production. The author chronicles the growth, expansion and later troubles of Chandler and Cleveland, providing fresh insight into the formative years of the auto industry and the personalities who made it go.
