[This book] analyzes ... the chains of blunders and bad judgments that led to fifteen legendary debacles, including the Firestone tire recall, EuroDisney, and Quaker's failed acquisition of Snapple. In each case, [the author]

pinpoints exactly how and where the decision-making process went wrong and shows what managers in any organization can learn from these monumental fiascoes. Based on his analysis of 400 strategic decisions made by top managers in areas such as products and services, pricing and markets, personnel policy, technology acquisition, and strategic reorganization, [the author] estimates that two-thirds of all decisions are based on failure-prone or questionable tactics. He uses the fifteen monumental decision-making disasters to illustrate the potential consequences of these common tactical errors and traps ... He then details successful alternative approaches to decision-making. -Back cover.

The Recent Firestone Tire Recall Action, Focusing on the Action as it Pertains to Relevant Ford Vehicles Chilton Book Company This project contains a look into the manufacturing company of Ford Motor Company. Research was done about how the company runs business, both globally and domestically. In this report, the company's mission, goals, strategies, product and service portfolios, market share and profit performance, technology and employment information are outlined. Key successes and

weakness failures are also discussed in detail. Information about Ford's use of computer systems and an information model for the company is also included. The information model displays Ford's Work System, showing which components of the Work Organization, Control System, Industrial Relations and Human Resources Practices Ford implements. The Business Organization, with Ford's Business Strategy and Enterprise Organization is also part of the model. At the end of the report, self-evaluations by team members and references can be found. Ford Motor Company is currently trying to increase its global market share in automobile sales while facing slumping market share numbers in the United States. This report examines the Ford company characteristics and how the company uses information systems in the business climate. To reduce costs and

increase knowledge of a region Ford uses small ERP systems that are less expensive and faster to implement than the larger ERP systems. Failure to obtain a larger market share in foreign markets has hurt the company. The proper use of information systems by Ford will increase their ability to maintain a successful business in future years locally and globally. Product Safety & Liability Reporter

This history of the Union XII

Corps “ skillfully weaves firsthand accounts into a compelling story about the triumphs and defeats of this venerable unit ” (Bradley M. Gottfried, author of *The Maps of Antietam*). The diminutive Union XII Corps found significant success on the field at Antietam. Its soldiers swept through the East Woods and the Miller Cornfield—permanently clearing both of Confederates—repelled multiple Southern assaults against the Dunker Church plateau, and eventually secured a foothold in the West Woods. This important piece of high ground had been the Union objective all morning, and its occupation threatened the center and rear of Gen. Robert E. Lee ’ s embattled Army of Northern Virginia. Yet federal leadership largely ignored this signal achievement and the opportunity it presented. The achievement of the XII Corps is especially notable given its string of disappointments and hardships in the months leading up to Antietam. M. Chris Bryan ’ s *Cedar Mountain to Antietam* begins with the formation of this often-luckless command as the II Corps in Maj. Gen. John Pope ’ s Army of Virginia on June 26, 1862. Bryan explains in meticulous detail how the corps endured a bloody and demoralizing loss after coming within a whisker of defeating Maj. Gen. “ Stonewall ” Jackson at Cedar Mountain on August 9; suffered through the

hardships of Pope ' s campaign before and after the Battle of Second Manassas; and triumphed after entering Maryland and joining the reorganized Army of the Potomac. The men of this small corps earned a solid reputation in the Army of the Potomac at Antietam that would only grow during the battles of 1863. This unique study, which blends unit history with sound leadership and character assessments, puts the XII Corps ' actions in proper context by providing significant and substantive treatment to its Confederate opponents. Bryan ' s extensive archival research, newspapers, and other important resources, together with detailed maps and images, offers a compelling story of a little-studied yet consequential command that fills a longstanding historiographical gap.

“ If We Are Striking for Pennsylvania ” , Volume 1: June 3 – 21, 1863

Scott L. Mingus Sr. and Eric J. Wittenberg, the authors of more than forty Civil War books, have once again teamed up to present a history of the opening moves of the Gettysburg Campaign in the two-volume study “ If We Are Striking for Pennsylvania ” : The Army of Northern Virginia and the Army of the Potomac March to Gettysburg. This compelling study is one of the first to integrate the military, media, political, social, economic, and civilian perspectives with rank-and-file accounts from the soldiers of both armies as they inexorably march toward their destiny at Gettysburg. This first installment covers June 3 – 21, 1863, while the second, spanning June 22 – 30, completes the march and carries the armies to the eve of the fighting. Gen. Robert E. Lee began moving part of his Army of Northern Virginia from the Old Dominion toward Pennsylvania on June 3, 1863. Lee believed his army needed to win a major victory on Northern soil if the South was to have a chance at winning the war. Transferring the fighting out of war-torn

Virginia would allow the state time to heal while he supplied his army from untapped farms and stores in Maryland and the Keystone State. Lee had also convinced Pres. Jefferson Davis that his offensive would interfere with the Union effort to take Vicksburg in Mississippi. The bold movement would trigger extensive cavalry fighting and a major battle at Winchester before culminating in the bloody three-day battle at Gettysburg. As the Virginia army moved north, the Army of the Potomac responded by protecting the vital roads to Washington, D.C., in case Lee turned to threaten the capital. Opposing presidents Abraham Lincoln and Jefferson Davis, meanwhile, kept a close watch on the latest and often conflicting military intelligence gathered in the field. Throughout northern Virginia, central Maryland, and south-central Pennsylvania, meanwhile, civilians and soldiers alike struggled with the reality of a mobile campaign and the massive logistical needs of the armies. Thousands left written accounts of the passage of the long martial columns. Mingus and Wittenberg mined hundreds of primary accounts, newspapers, and other sources to produce this powerful and

gripping account. As readers will quickly learn, much of it is glossed over in other studies of the campaign, which cannot be fully understood without a firm appreciation of what the armies (and civilians) did on their way to the small crossroads town in Pennsylvania.
