Since 1991, the popular and highly modifiable Ford 4.6-liter has become a modern-day V-8 phenomenon, powering everything from Ford Mustangs to hand-built hot rods and the 5.4-liter has powered trucks, SUVs, the Shelby GT500, and more. The wildly popular 4.6-liter has created an industry unto itself with a huge supply of aftermarket high-performance parts, machine services, and accessories. Its design delivers exceptional potential, flexibility, and reliability. The 4.6-liter can be built to produce 300 hp up to 2,000 hp, and in turn, it has become a favorite among rebuilders, racers, and high-performance enthusiasts. 4.6-/5.4-Liter Ford Engines: How to Rebuild expertly guides you through each step of rebuilding a 4.6-liter as well as a 5.4-liter engine, providing essential information and insightful detail. This volume delivers the complete nuts-and-bolts rebuild story, so the enthusiast can professionally rebuild an engine at home and achieve the desired performance goals. As with all Workbench Series books, this book is packed with detailed photos and comprehensive captions, where you are guided step by step through the disassembly, machine work, assembly, start-up, break-in, and tuning procedures for all iterations of the 4.6-/5.4-liter engines, including 2-valve and 3-valve SOHC and the 4-valve DOHC versions. The Taurus is one of the best-selling cars in the U.S., but the street version bears little resemblance to the Taurus that races on Sundays. It is campaigned by legendary drivers such as Dale Jarrett, Mark Martin, Ricky Rudd, Jeff Burton, and 2003 series champion Matt Kenseth. This book explains in technical detail all the nuances and differences between the street version and race version, including the chassis and roll cage, the suspension, steering and brakes, the engine and drive train, engine support systems, and the interior and body. The new RaceCarTech Series of books features a level of very useful technical detail sought not only by the enthusiast, but also by the model car builder. Detailed photos and accurately scaled shots provide a resource not found anywhere else. 70 percent of plastic model kit sales in the US are cars, and the majority of those are race car models.
