Those 80s Cars - American Catalog

Haynes Manuals N. America, Incorporated

The automotive industry underwent great change in the 1960s and the early 1970s.

The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the "need for speed"

characterized this period, loosely labeled as the muscle car era. This is an

exhaustive reference work to American made cars of model years 1966-1972.

Organized by year (and summarizing the market annually), it provides a yearly

update on each make's status and production figures, then details all models

offered for that year. Model listings include

available body styles, base prices, engine and transmission choices, power ratings,

standard equipment, major options and their prices, curb weight and dimensions

(interior and exterior), paint color choices, changes from the previous year's model,

and sales figures. Also given are assembly plant locations and historical overviews of

each model nameplate.

The 1973 oil crisis forced the American automotive industry into a period of

dramatic change, marked by stiff foreign competition, tougher product regulations

and suddenly altered consumer demand.

With gas prices soaring and the economy in a

veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were

out, and fuel efficient compacts were in. By 1980, American manufacturers were

churning out some of the most feature laden, yet smallest and most fuel efficient cars they

had ever built. This exhaustive reference work details every model from each of the

major American manufacturers from model years 1973 through 1980, including various

"captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it

reports on each manufacturer's significant news and details every model offered: its

specifications, powertrain offerings, prices,

standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.
