Haynes Manuals "Provides service and repair information for the fifth generation, also known as the A5 platform Volkswagen Jetta" -- Provided by publisher. Honda Engine Swaps Office of the Federal Register For decades there have been two iconic Japanese auto companies. One has been endlessly studied and written about. The other has been generally underappreciated and misunderstood. Until now. Since its birth as a

motorcycle company in 1949, Honda has steadily grown into the world's fifth largest automaker and top engine manufacturer, as well as one of the most beloved, most profitable, and most consistently innovative multinational corporations. What drives the company that keeps creating and improving award-winning and bestselling models like the Civic, Accord, Odyssey, CR-V, and Pilot? According to Jeffrey Rothfeder - the first journalist allowed behind Honda's infamously private doors - what truly distinguishes Honda from its competitors,

especially archival
Toyota, is a deep
commitment to a set
of unorthodox
management tenets.
The Honda Way, as
insiders call it, is
notable for
decentralization
over corporate
control, simplicity
over complexity and
unyielding cynicism
toward the status
quo and whatever is
assumed to be the
truth - ideas
embedded in the
DNA of the
company by its
colourful founder
Soichiro Honda,
sixty-five years ago.
With dozens of
interviews of Honda
executives,
engineers, and
frontline employees,
Rothfeder shows
how the company

has developed and
maintained its
unmatched culture
of innovation,
resilience, and
flexibility - and how
it exported that
culture to other
countries that are
strikingly different
from Japan,
establishing locally
controlled
operations in each
region where it lays
down roots. For
instance, Rothfeder
reports on life at a
Honda factory in
the tiny town of
Lincoln, Alabama.
When the American
workers were
trained to follow the
Honda Way as a self-
sufficient outpost of
the global company,
their plant
pioneered a new
model for

manufacturing in
America. As
Soichiro Honda
himself liked to say,
"Success can be
achieved only
through repeated
failure and
introspection. In
fact, success
represents one
percent of your
work, which results
only from the ninety-
nine percent that is
called failure."
