With a wealth of examples and exercises, this is a brand new edition of a classic work on multivariate data analysis. A key advantage of the work is its accessibility. This is because, in its focus on applications, the book presents the tools and concepts of multivariate data analysis in a way that is understandable for non-mathematicians and practitioners who need to analyze statistical data. In this second edition a wider scope of methods and applications of multivariate statistical analysis is introduced. All quantlets have been translated into the R and Matlab language and are made available online.

When installing or servicing an air conditioning or refrigeration system, two of the most important tasks performed by technicians are refrigerant recovery and system evacuation. In order to perform these tasks properly, and in a safe manner, technicians need to understand the theory behind them, having a working knowledge of the equipment and tools used, and employ accepted industry best practices. This e-book walks through each step of both tasks, while covering safety, theory, and application. Also covered are leak detection methods and filter drier use. System Recovery and Evacuation was written by HVACR instructors for HVACR instructors to provide sound, relevant information in a single source. This e-book provides students and practicing technicians with the information and knowledge necessary to understand refrigerant recovery, system

evacuation, leak detection, and filter driers. It is full of color illustrations and includes worksheets that provide students and practicing technicians with the information and knowledge necessary to accurately and safely install or service air conditioning and refrigeration systems. The end of the e-book contains fill-in-the-blank questions that review the content of the entire manual.

Competing for Global Dominance' sets the stage for a new paradigm required for growth of the globalized market in the 21st century and outlines the issues that entrepreneurs and businesses will face as they compete for survival in a world marketplace no longer hindered by time and distance. As the Silicon Valley success model moves into its adolescence and transforms its methodology as demonstrated on web sites such as Facebook, YouTube, LinkedIn, LinkSV, Twitter, and Ecademy which allow groups of individuals and businesses from around the world to meet, communicate and collaborate to expand their influence and market share by developing new ways of doing business. But before this can be effectively accomplished, a new approach needs to be established for how to compete, grow and survive in this new globalized environment. Many governments, educational and private organizations have tried to duplicate the success of Silicon Valley with limited degrees of success, most without really understanding the new dynamics of global competition and how to enter new markets. This book shows the thought leadership from a practitioners viewpoint who works with entrepreneurs and companies from around the world to position them for survival and expansion in the new world of globalization.

In this, the third volume in his comprehensive, highly illustrated three-volume history of the evolution of armored maneuver warfare in the British army, Dick Taylor covers the post-war period, up to the present day. He explains how the Royal armored Corps contracted rapidly after 1945, then faced the twin challenges of National Service and heavy involvement in numerous wars and campaigns around the globe. He recounts how the RAC became a fully-professional organization by the early 1960s, and continues the tale of disbandments, down-sizing and amalgamations. In a narrative which is as much a social history as an operational one, the vivid personal accounts of soldiers feature heavily throughout. The story of the Cold War in Germany (BAOR) is told. Then, after the fall of the Berlin Wall, the book describes the role British armor played in conflicts in the Gulf, the Balkans and Afghanistan. Dick Taylor's thoroughgoing account concludes with an assessment of the RAC in 2021 in the immediate aftermath of another defense review.
