The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen

went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

The War in Iraq, the 2000 Election Debacle, the Monica Lewinsky Affair, and so many other pivotal events shaped the American experience in the 21st Century. This book takes the timelines for these critical events (and MANY more), and then it meshes them together for a historical perspective. They say "Hindsight is 20-20," and as such, readers can now see those events in the context of their times, and not the context of a politically-charged opinion piece. Here and now, readers can view the entire American experience in Iraq from President Bush Sr.'s 9/11/90 address to Congress (in which he declared the start of a New World Order), through the wars, the inspections, the repeated air campaigns, the failed diplomacy, and finally to Saddam's capture. There are also specific sections showing never-before seen timelines of The Ignored War over the No-Fly Zones in Iraq, and the growth of Al Queda in the New

World Order. Events which continue to be viewed in a political perspective had a historical effect and not just a political effect.
