Transnational Companies (19th-20th centuries) gathers texts which were presented during the fourth convention of the European Business History Association in Bordeaux in September 2000. Most of them come from matured and well-known business historians or business schools specialists, but a bunch of texts were provided too by junior researchers, who found thus a way to promote their brand new inquiries ! Most branches are studied here, either heavy industries or agrobusiness and textile ; but specific areas are well approached : luxury firms, wine and beverages companies, for instance. The focus of Transnational Companies is to scrutinize the emergence of international policies among enterprises, whether through exports strategies or through direct investments in foreign countries, along branches, ways of development, entrepreneurial undertakings or competition's incentives. The book assesses too the move from internationalisation to transnationalisation in the interwar and mostly since the 1960s : owing to several case studies here presented, business schools and economic historians will be able to foster tuitions and seminars with fresh material. Lest several papers are earmarked to the argument about globalisation, that is the restructuring of firms'organisation towards internationalised internal divisions since the 1970s-1980s, as the book does cover the very last years of the 20th century.

On October 14-19, 1990, the 6th International Conference on the Conservation of Earthen Architecture was held in Las Cruces, New Mexico. Sponsored by the GCI, the Museum of New Mexico State Monuments, ICCROM, CRA Terre-EAG, and the National Park Service, under the aegis of US/ICOMOS, the event was organized to promote the exchange of ideas, techniques, and research findings on the conservation of earthen architecture. Presentations at the conference covered a diversity of subjects, including the historic traditions of earthen architecture, conservation and restoration, site preservation, studies in consolidation and seismic mitigation, and examinations of moisture problems, clay chemistry, and microstructures. In discussions that focused on the future, the application of modern technologies and materials to site conservation was urged, as was using scientific knowledge of existing structures in the creation of new, low-cost, earthen architecture housing.

The book that turns our understanding of motivation on its head . . . and shows why most companies get it wrong. There are few people with more experience and accumulated wisdom about the inner workings of business and how people can work together more effectively than Jon Katzenbach. His groundbreaking research has resulted in several important books, including The Wisdom of Teams and Real Change Leaders. Over the past several years he has turned his attention to one of the perennial questions of leaders everywhere: How do I motivate my employees? Most everyone frets about how to devise schemes that will keep the troops revved up. Conventional wisdom—or at least the practice at most companies—often centers on money as the primary motivating force. Many also rely on intimidation, which like money generally has a short-term impact. But what Katzenbach has found in his research at many organizations is that both of these practices do little to build the long-term sustainability of an organization. For that you need a powerful force that has been—until this point—understood by few managers and implemented by fewer still: pride. From the front lines to the executive suite, most people are motivated by feelings of accomplishment, approval, and camaraderie. It ' s why the best employees strive well beyond performance levels that will yield them higher pay and why most true professionals relentlessly avoid retirement. Why does Southwest Airlines consistently turn in the highest levels of performance and profitability of any company in the airline business? What can the U.S. Marines teach us about individual commitment that can be used in the for-profit world? How is General Motors overcoming its history of labor-management enmity through the efforts of “pride-builders” from both the union and the management side? By drawing on what he has learned from these and many other organizations, Jon Katzenbach provides a practical program for understanding the role of pride: • Money is not the

motivator most people think it is: Katzenbach shows why pay-for-performance programs by themselves result in employees who focus on self-serving behavior and skin-deep organizational commitment. • Money tends to be a short-term motivational device and works best during times of growth, but pride works in bad times as well as good. • Cultivating pride is an investment that yields high returns on workforce performance over time and is not nearly as costly as relying solely on monetary compensation and the turnover risks that accompany a “show me the money” culture. Katzenbach shares unique insights and specifics about how the best mid-level pride-builders take advantage of the world ' s greatest motivational force even in environments as challenging as General Motors and Aetna. He shows how managers at every level are missing a powerful lever if they are not instilling pride as a primary force for building their organization. Also available as an eBook.
