July 2019 marks 50 years since Neil  
Armstrong took his famous first steps on  
the surface of the Moon. As people around  
the world celebrate the anniversary of this  
great American achievement, they might  
wonder why there have been no further  
human missions to the Moon since Apollo  
17 in 1972. This book assesses the legacy  
of the Apollo missions based on several  
decades of space developments since the  
program's end. The question of why we  
haven't sent humans back to the Moon is  
explored through a multidisciplinary lens  
that weaves together technological and  
historical perspectives. The nine manned  
Apollo missions, including the six that  
landed on the Moon, are described here  
by an author who has 50 years of  
experience in the space industry and  
whose work spanned the Apollo 8–13

missions. The final section of the book  
provides a comprehensive assessment of  
today's programs and current plans for  
sending humans to the Moon.

**Annual Report**

This work describes riverine  
combat during the Vietnam War,  
emphasizing the operations of the  
U.S. Navy 's River Patrol Force,  
which conducted Operation Game  
Warden; the U.S. Army-Navy  
Mobile Riverine Force, the  
formation that General William  
Westmoreland said " saved the  
Mekong Delta " during the Tet  
Offensive of 1968; and the Vietnam  
Navy. An important section details  
the SEALORDS combined  
campaign, a determined effort by  
U.S. Navy, South Vietnamese Navy,

and allied ground forces to cut enemy supply lines from Cambodia and disrupt operations at base areas deep in the delta. The author also covers details on the combat vessels, helicopters, weapons, and equipment employed in the Mekong Delta as well as the Vietnamese combatants (on both sides) and American troops who fought to secure Vietnam's waterways.

Special features focus on the ubiquitous river patrol boats (PBRs) and the Swift boats (PCFs), river warfare training, Vice Admiral Elmo R. Zumwalt Jr., the Black Ponies aircraft squadron, and Navy SEALs. This publication may be of interest to history scholars, veterans, students in advanced placement history classes, and military enthusiasts given the continuing impact of riverine warfare on U.S. naval and military operations in the 21st century.

Special Publicity Tie-In: Commemoration of the 50th anniversary of the Vietnam War (Commemoration dates: 28 May 2012 - 11 November 2025). This is the fifth book in the series, "The U.S. Navy and the Vietnam War."

2008 Outstanding Academic Title, Choice Magazine From dirt bikes and jet skis to weed wackers and

snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.
