Mini Down Under traces the history of one of New Zealand's - and the world's - best-loved cars. More versions of the Mini were available in New Zealand than anywhere else, and the launching of the iconic car in February 1960 was a larger-than-life event. In this lively and personal story, the author tracks the Mini's life in New Zealand, the connection between Kiwi racing driver Bruce McLaren and the birth of the Mini Cooper, the heady days of competition success in the Antipodes, the local assembly and marketing of the classic original car and the eventual development into the latest generation Mini for a new century.

Extracting maximum torque and horsepower from engines is an art as well as a science.

David Vizard is an engineer and more aptly an engine building artist who guides the reader through all the aspects of power production and high-performance engine building. His proven high-performance engine building methods and techniques are revealed in this all-new edition of How to Build Horsepower. Vizard goes into extreme depth and detail for drawing maximum performance from any automotive engine. The production of power is covered from the most logical point from the air entering the engine all the way to spent gasses leaving through the exhaust. Explained is how to optimize all the components in between, such as selecting heads for maximum flow or port heads for superior power output, ideal valvetrain components, realizing the ideal rocker arm ratios for a particular application, secrets for selecting the best cam, and giving unique insight into all facets of cam performance. In addition, he covers how to select and setup superchargers, nitrous oxide, ignition and other vital aspects of high-performance engine building.

The Romans wrote solemn religious, public, and legal documents on wooden tablets often coated with wax. This book investigates the historical significance of this resonant form of writing and its power to make documents efficacious. It traces its role in court, its spread to the provinces (an aspect of Romanization) and its influence on the evolution of Roman law. Elizabeth Meyer reveals how Roman legal documents on tablets are the ancestors of today's dispositive legal documents--the document as the act itself. In a world where knowledge of Roman law was scarce (and enforcers scarcer), Roman law drew its authority from a wider world of belief.

" One of the most acute books about management and how companies work in practice that I have read in a long time. If anyone wants to know exactly how the U.S. auto industry got into trouble, here is your guide. " —John Gapper, FINANCIAL TIMES When Bob Lutz got into the auto business in the early 1960s, CEOs knew that if you captured the public ' s imagination with innovative car design and top-quality craftsmanship, the money would follow. The " car guys " held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM ' s leadership began to put its faith in numbers and spreadsheets. Determined to eliminate the " waste " and " personality worship " of the bygone creative leaders, management got too smart for its own good. With the bean counters firmly in charge, carmakers, and much of American industry, lost their single-minded focus on product excellence and their competitive advantage. Decline soon followed. In 2001, General Motors hired Lutz out of retirement with a mandate to save the company by making great cars again. As vice chairman, he launched a war against the penny-pinching number crunchers who ran the company by the bottom line and reinstated a focus on creativity, design, and cars and trucks that would satisfy GM ' s customers. Lutz ' s commonsense lessons, combined with a generous helping of fascinating anecdotes, will inspire readers in any industry.
