The automotive
industry underwent
great change in the
1960s and the early
1970s. The continuing
trend toward market
consolidation, the
proliferation of sizes
and nameplates, and
the "need for speed"
characterized this
period, loosely
labeled as the muscle
car era. This is an
exhaustive reference
work to American made
cars of model years
1960-1972. Organized

by year (and summarizing the market annually), it provides a yearly update on each make's status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year's model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.
