The Atlantic Crossing Guide is a complete reference for anyone planning an Atlantic passage in their own boat. It is described by Yachting World magazine as 'An invaluable mixture of planning manual and pilot book, and an essential investment if you're planning to cross the Pond.' From ideal timing, suitable boats, routes, methods of communication and provisioning to sources of regional weather information, hurricane tracks, currents and tides, departure and arrival ports, facilities on arrival and documentation required, the comprehensiveness of this new edition will both inspire dreamers and instill confidence in those about to depart. This is the definitive reference on the subject, relied upon by many thousands of cruisers crossing the Atlantic in both directions and packed with all the information they need. Navigator Whether you're a new mariner or a lifetime veteran, How Boat Things Work is a resource you can't afford to be without. With intricate two-color cutaway drawings of eighty different systems and devices, as well as detailed explanations of how they're assembled, how they work, and how they can go wrong, this book covers every primary component of your boat's inner workings. This guided tour "under the hood" of your sailboat or powerboat includes: Engines, transmissions, bearings, stuffing boxes, propellers Steering systems, autopilots, windvanes, compasses Rigging, splicing, line handling, block and tackle, sail controls Anchors and windlasses DC and AC electrical systems Pumps, toilets, seacocks, freshwater systems *Powerboater's Guide to Electrical Systems, Second Edition* McGraw Hill Professional The second in a series of highly practical, hands on, step-by-step photographic manuals, *Replacing Your Boat's Electrical System* fills a gap in the market for the DIY boat builder and repairer. It is a subject covered only in piecemeal fashion by the yachting press, which, like general boat repair manuals, can't go into the level of detail Micke Westin does. This is a visual, hand-holding guide, dwelling on the details as it explains each procedure rather than focussing on the theory (which is relegated to an appendix, for those who wish to go further).

This volume collects the most intimate writings of one of the foremost French thinkers of the twentieth century on the central topic of his oeuvre. These essays, aphorisms, notes, and lectures on nonknowledge, sovereignty, and sacrifice clarify and extend Bataille's radical theology, his philosophy of history, and his ecstatic method of meditation. The "system" that emerges from his body of work is "atheology", a study of the effects of nonknowledge.
