The Localist: Think Independent, Buy Local, and Reclaim the American Dream is the story of one girl's journey from buy-local blogger to woman entrepreneur and indie-shop advocate. When Carrie Rollwagen decided to give up corporate shopping for a year and instead shop local-only, she knew that she'd have to learn how to shop local, that she'd discover new indie businesses, and that she'd need to makeover her shopping habits. What she didn't know is that she'd save money, discover how to connect with her community, and learn to love indie business more than the big box stores she'd bought from all her life. She also didn't know that, before her buy-local year was over, she'd be the owner of her own independent business, a community coffee shop and indie bookstore in Birmingham, Alabama. In The Localist, we follow Carrie on her localist adventure as she embraces slow food, small business, the locavore movement, and many quirky indie shopkeepers and unique independent shops along the way. She tells the story of her year of blogging about buying local in Birmingham, Alabama, and she gives us an inside look at her experience as a new female entrepreneur opening a new neighborhood business: Church Street Coffee & Books, an independent bookshop and locally owned coffee shop. Part memoir, part manual on how to shop local, The Localist is pro-community, but it's not necessarily anti-corporate. Carrie doesn't attack all big business, but rather shows us what we create with our shopping dollars and helps us see new ways of making positive impact on our communities with our spending. Big box stores are convenient, but corporations are not people, and it's important that we shop local and support indie business to keep the scales balanced between Main Street and Corporate America. Carrie Rollwagen is a copywriter and independent business owner based in Birmingham, Alabama. The Localist: Think Independent, Buy Local, and Reclaim the American Dream, based on her year-long blog about choosing independent shops over big box stores, is her first book.

With fuel costs and parking charges it's no wonder the consumer is looking for less expensive forms of travel. This book is aimed at the rider who wants to do his or her own basic scooter maintenance and servicing without the need for in-depth mechanical knowledge, or a technical manual. It covers areas such as oil, brakes, tyres, transmission, electrics, etc, allowing the owner to address the most regularly serviced items without forking out for additional costs. Illustrated with full colour photographs throughout, and featuring clear, easy-to-follow instructions, this book is a must-have for scooter users.

Biogeography represents one of the most complex and challenging aspects of macroevolutionary research, requiring input from both the earth and life sciences. Palaeogeographic reconstruction is frequently carried out by researchers with backgrounds in geology and palaeontology, who are less likely to be familiar with the latest biogeographic techniques: conversely, biogeographic methods are often devised by neontologists who may be less familiar with the fossil record, stratigraphy, and palaeogeography. Palaeogeography and Palaeobiogeography: Biodiversity in Space and Time bridges the gap between these two communities of researchers, who work on the same issues but typically use different types of data. The book covers a range of topics, and reflects some of the major overall questions in the field such as: Which approaches are best suited to reconstructing biogeographic histories under a range of circumstances? How do we maximize the use of organismal and earth sciences data to improve our understanding of events in earth history? How well do analytical techniques devised for researching the biogeography of extant organisms perform in the fossil record? Can alternative biodiversity metrics, particularly those based on morphological measurements, enhance our understanding of biogeographic patterns and processes? This book approaches palaeobiogeography with coverage of technological applications and detailed case studies. It spans a wide selection of overlapping and integrative disciplines, including evolutionary theory, vicariance biogeography, extinctions, and the philosophical aspects of palaeogeography. It also highlights new technological innovations and applications for research. Presenting a unique discussion of both palaeogeography and palaeobiogeography in one volume, this book focuses both historically and philosophically on the interface between geology, climate, and organismal distribution.

WINNER OF THE JAMES BEARD FOUNDATION 2020 AWARD FOR BEST SINGLE SUBJECT COOKBOOK Learn how to make pasta like Italian nonnas do. Inspired by the hugely popular YouTube channel of the same name, Pasta Grannies is a wonderful collection of time-perfected Italian pasta recipes from the people who have spent a lifetime cooking for love, not a living: Italian grandmothers. “When you have good ingredients, you don’t have to worry about cooking. They do the work for you.” – Lucia, 85 Featuring easy and accessible recipes from all over Italy, you will be transported into the very heart of the Italian home to learn how to make great-tasting Italian food. Pasta styles range from pici – a type of hand-rolled

spaghetti that is simple to make – to lumachelle della duchessa – tiny, ridged, cinnamon-scented tubes that take patience and dexterity. More than just a compendium of dishes, Pasta Grannies tells the extraordinary stories of these ordinary women and shows you that with the right know how, truly authentic Italian cooking is simple, beautiful and entirely achievable.

An integrated approach to the empirical application of dynamic optimization programming models, for students and researchers. This book is an effective, concise text for students and researchers that combines the tools of dynamic programming with numerical techniques and simulation-based econometric methods. Doing so, it bridges the traditional gap between theoretical and empirical research and offers an integrated framework for studying applied problems in macroeconomics and microeconomics. In part I the authors first review the formal theory of dynamic optimization; they then present the numerical tools and econometric techniques necessary to evaluate the theoretical models. In language accessible to a reader with a limited background in econometrics, they explain most of the methods used in applied dynamic research today, from the estimation of probability in a coin flip to a complicated nonlinear stochastic structural model. These econometric techniques provide the final link between the dynamic programming problem and data. Part II is devoted to the application of dynamic programming to specific areas of applied economics, including the study of business cycles, consumption, and investment behavior. In each instance the authors present the specific optimization problem as a dynamic programming problem, characterize the optimal policy functions, estimate the parameters, and use models for policy evaluation. The original contribution of Dynamic Economics: Quantitative Methods and Applications lies in the integrated approach to the empirical application of dynamic optimization programming models. This integration shows that empirical applications actually complement the underlying theory of optimization, while dynamic programming problems provide needed structure for estimation and policy evaluation.

This unique and authoritative book will be treasured by anyone who owns, or aspires to own, a piano and by all who enjoy piano music and are interested in knowing more about the history and characteristics of the instrument. It describes the evolution of the piano from its invention at the end of the seventeenth century up to the modern concert grand, and discusses the relationship between the music of composers from J C Bach to Debussy and the instruments for which it was written. There is comprehensive, worldwide directory of piano makers from the nineteenth century onwards with describing the history of each firm and illustrating the models they produced in the past, including charts of serial numbers by decade, as well as the range of instruments currently available. The author provides invaluable advice on choosing a new piano and expert tips on what to look out for when buying a second-hand instrument. A chapter is devoted to the perils and pitfalls of restoration while another gives step-by-step instructions on the care and maintenance needed to ensure that your piano is kept in peak condition. Beautifully illustrated with photographs and cut-away diagrams, The Piano is ever

A simplified approach to applying the Finite Element Method to geotechnical problems Predicting soil behavior by constitutive equations that are based on experimental findings and embodied in numerical methods, such as the finite element method, is a significant aspect of soil mechanics. Engineers are able to solve a wide range of geotechnical engineering problems, especially inherently complex ones that resist traditional analysis. Applied Soil Mechanics with ABAQUS® Applications provides civil engineering students and practitioners with a simple, basic introduction to applying the finite element method to soil mechanics problems. Accessible to someone with little background in soil mechanics and finite element analysis, Applied Soil Mechanics with ABAQUS® Applications explains the basic concepts of soil mechanics and then prepares the reader for solving geotechnical engineering problems using both traditional engineering solutions and the more versatile, finite element solutions. Topics covered include: Properties of Soil Elasticity and Plasticity Stresses in Soil Consolidation Shear Strength of Soil Shallow Foundations Lateral Earth Pressure and Retaining Walls Piles and Pile Groups Seepage Taking a unique approach, the author describes the general soil mechanics for each topic, shows traditional applications of these principles with longhand solutions, and then presents finite element solutions for the same applications, comparing both. The book is prepared with ABAQUS® software applications to enable a range of readers to experiment firsthand with the principles described in the book (the software application files are available under "student resources" at www.wiley.com/college/helwany). By presenting both the traditional solutions alongside the FEM solutions, Applied Soil Mechanics with ABAQUS® Applications is an ideal introduction to traditional soil mechanics and a guide to alternative solutions and emergent methods. Dr. Helwany also has an online course based on the book available at www.geomilwaukee.com.

In this groundbreaking union of art and science, rocker-turned-neuroscientist Daniel J. Levitin explores the connection between music—its performance, its composition, how we listen to it, why we enjoy it—and the human brain. Taking on prominent thinkers who argue that music is nothing more than an evolutionary accident, Levitin poses that music is fundamental to our species, perhaps even more so than language. Drawing on the latest research and on musical examples ranging from Mozart to Duke Ellington to Van Halen, he reveals: • How composers produce some of the most pleasurable effects of listening to music by exploiting the way our brains make sense of the world • Why we are so emotionally attached to the music we listened to as teenagers, whether it was Fleetwood Mac, U2, or Dr. Dre • That practice, rather than talent, is the driving force behind musical expertise • How those insidious little jingles (called earworms) get stuck in our head A Los Angeles Times Book Award finalist, This Is Your Brain on Music will attract readers of Oliver Sacks and David Byrne, as it is an unprecedented, eye-opening investigation into an obsession at the heart of human nature.

Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their

handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel

This bible of the piano marketplace is indispensable to buyers and owners of pianos, amateur and professional players alike. Hundreds of thousands of pianos are bought and sold each year, yet most people buy a piano with only the vaguest idea of what to look for as they make this major purchase. The Piano Book evaluates and compares every brand and style of piano sold in the United States. There is information on piano moving and storage, inspecting individual new and used pianos, the special market for Steinways, and sales gimmicks to watch out for. An annual supplement, sold separately, lists current prices for more than 2,500 new piano models.
