These engines were designated 23L. 300 TDi front end showing serpentine belt and tensioner (top centre) The 300 TDi was available on the UK market until 1998, when new EU emission regulations led to it being replaced by the all-new TD5. It remained available for export and military markets until 2006.

[The 300Tdi Engine - Land Rover Expedition](#)

Engines used by the British company Land Rover in its 4x4 vehicles have included 4-cylinder petrol engines, and 4-cylinder and 5-cylinder diesel engines. In the 1960s and 1970s a 2.6 litre straight-six petrol engine of Rover design was available as a option in the long wheelbase versions.6-cylinder engines have been used for Land Rover vehicles built under licence.

The 300 Tdi Defender went into service in the "Green Fleet" from 1998. Before the 300Tdi engine was introduced, military Land Rovers were offered with 2.5-litre petrol and diesel engines, as well as the 3.5-litre V8 petrol. Trials with the Td5 engine proved it to be reliable in battlefield conditions.
