This book is a compilation of the best tips submitted by readers of the Trailer Life magazine column "10-Minute Tech." These RVers have discovered simple, quick ways to solve small onboard problems; get things to run smoother, quieter, and better; personalize an RV with changes and upgrades; and make life on the road easier.

The Art of Talk

Gramedia Pustaka Utama Computer Graphics from Scratch demystifies the algorithms used in modern graphics software and guides beginners through building photorealistic 3D renders. Computer graphics programming books are often math-heavy and intimidating for newcomers. Not this one. Computer Graphics from Scratch takes a simpler approach by

keeping the math to a minimum and focusing on only one aspect of computer graphics, 3D rendering. You'll build two complete, fully functional renderers: a raytracer, which simulates rays of light as they bounce off objects, and a rasterizer, which converts 3D models into 2D pixels. As you progress you'll learn how to create realistic reflections and shadows, and how to render a scene from any point of view.

Pseudocode examples throughout make it easy to write your renderers in any language, and links to live JavaScript demos of each algorithm invite you to explore further on your own. Learn how to:

- Use perspective projection to draw 3D objects on a 2D plane
- Simulate the way rays of light interact with surfaces
- Add mirror-like reflections and cast shadows to objects
- Render a scene from any camera position

using clipping planes

- Use flat, Gouraud, and Phong shading to mimic real surface lighting
- Paint texture details onto basic shapes to create realistic-looking objects

Whether you're an aspiring graphics engineer or a novice programmer curious about how graphics algorithms work, Gabriel Gambetta's simple, clear explanations will quickly put computer graphics concepts and rendering

techniques within your reach. All you need is basic coding knowledge and high school math. Computer Graphics from Scratch will cover the rest. Mine and Quarry World Bank Publications

I wanted to say, "I would love to know your obsessions, Is it landed house, gadgets, power, domestic life, succulent plants, achievements, money, work, more likes and followers, health, validations, sex, organic food, pets, perfect selfies, children, sports, Religion & Spirituality,

relationship, minimalism, perfection, muscles, urban toys, shoes, traveling, or fame?" but nobody is prepared for that kind of question on a first date. So I said, "You look great." 10-Minute Tech Sagwan Press

Moan was born in 2018, with the aim to tear-down the stigma attached to female pleasure by liberating women and using our platform as a conversation starter. We are depicting a female narrative, talking about sex through a female perspective and taking control of

the subject; a narrative that the mainstream sex industry doesn't often highlight. Moan is a safe space and a judgement free zone for experiences, fantasies, fetishes and issues to be discussed within the community openly. We aim to inspire women to take control of their sexual fantasies and needs; to be turned on by their own existence and to be their own experts. Issue Three: A big Fuck You to the complexities of society which oppress and shame sexual liberation for women. 86 pages

filled with honest and unique submission from all over the world, each exploring even more fantasies, fetishes and desires. Featuring new voices, experiences and conversation starters around safe sex, consent and positivity; we hope there is something in here for everyone and encourages you to explore true sexual liberation in your own terms. Filthy, uncensored illustrations are of course a huge feature in Issue Three and we've put in a lot of love and effort to make it as luxurious as

possible - with a matt black cover, hand embossed gloss illustration and MOAN in gold screen printing ink, we've made this the sexiest publication it can be. Probability and Forensic Evidence The Floating Press THE MODERN CARAVAN is a warm invitation into rolling homes designed for life on the open road. Brimming with evocative storytelling and hundreds of photographs showcasing handsome interiors and stunning landscapes, this book features 25

stories from solo travelers, couples, and families who traded the comforts of a rooted life for ever-changing vistas and eye-opening experiences. You'll meet a family exploring Australia in a cozy vintage camper filled with plants and natural wood finishes; a young couple designing a modern trailer inspired by the colors and textures of the high desert; a husband and wife living in a chic Airstream with green velvet seating, floral wallpaper, and herringbone wood floors. Balancing style with

function, each carefully crafted tiny home is the result of long-held dreams, ingenuity, and imagination. The increasing concern with indoor air quality has led to air-quality standards with increased ventilation rates. Although increasing the volume flow rate of outside air is advisable from the perspective of air-quality, it is detrimental to energy consumption, since the outside air has to

be brought to the comfort condition before it is insufflated to the conditioned ambient. Moreover, the humidity load carried within outside air has challenging HVAC engineers to design cooling units which are able to satisfactorily handle both sensible and latent contributions to the thermal load. This constitutes a favorable scenario for the use of solid desiccants to assist the cooling units. In fact, desiccant wheels have been increasingly applied by HVAC designers, allowing distinct processes for the air cooling and dehumidification. In fact, the ability of solid desiccants in moisture removal is effective enough to allow the use of evaporative coolers, in opposition

to the traditional vapor-compression cycle, resulting in an ecologically sound system which uses only water as the refrigerant. Desiccant Assisted Cooling: Fundamentals and Applications presents different approaches to the mathematical modeling and simulation of desiccant wheels, as well as applications in thermal comfort and humidity controlled environments. Experts in the field discuss topics from enthalpy, lumped models for heat and mass transfer, and desiccant assisted radiant cooling systems, among others. Aimed at air-conditioning engineers and thermal engineering researchers, this book can also be used by graduate level students

and lecturers in the field.
Girl Last Seen
Hassell Street Press
Intensely private radio personality Art Bell, who lives in the middle of the desert 65 miles west of Las Vegas--where he broadcasts his radio shows--finally comes forward with his fascinating autobiography. Beans 20 Ways Arcadia Publishing
What 's the worst thing about wanting a sexy NFL football player? Everyone else wants him, too. After catching my boyfriend getting deep-

throated by a cage girl, I 've learned my lesson -- never date a professional athlete. Never. Besides, I have more important things to worry about, like not blowing my shot to make it as a broadcast reporter. I won 't let anything get in my way, not even the new " it boy " of the NFL and my hot-as-hell neighbor. What's the worst thing about getting death glares from his new neighbor? It doesn't make him want her any less. I 've worked my ass off to make it to the pros. The last thing

I need is the complication of a relationship, especially since my last one was a total train wreck. But I can't stop thinking about the feisty girl next door with the smart mouth. And I'd love nothing more than to show her what to do with that mouth. Friends with benefits might be the best idea he's ever had. Or the worst. **KISSING MADELINE**, the third book in The Dearest Series, can be read a standalone novel. This new adult romance is recommended for readers 18+ due to

mature content. **ORDER OF BOOKS:** Dearest Clementine (Clementine & Gavin) Finding Dandelion (Dani & Jax) Kissing Madeline (Maddie & Daren) Reading the Old Norse-Icelandic "Mar í u saga" in Its Manuscript Contexts Prentice Hall Do you want to understand Neural Networks and learn everything about them but it looks like it is an exclusive club? Are you fascinated by Artificial Intelligence but you think that it would be too

difficult for you to learn? If you think that Neural Networks and Artificial Intelligence are the present and, even more, the future of technology, and you want to be part of it... well you are in the right place, and you are looking at the right book. If you are reading these lines you have probably already noticed this: Artificial Intelligence is all around you. Your smartphone that suggests you the next word you want to type, your Netflix account that recommends you the series you may

like or Spotify's personalised playlists. This is how machines are learning from you in everyday life. And these examples are only the surface of this technological revolution. Either if you want to start your own AI enterprise, to empower your business or to work in the greatest and most innovative companies, Artificial Intelligence is the future, and Neural Networks programming is the skill you want to have. The good news is that there is no exclusive club,

you can easily (if you commit, of course) learn how to program and use neural networks, and to do that Neural Networks for Beginners is the perfect way. In this book you will learn: The types and components of neural networks The smartest way to approach neural network programming Why Algorithms are your friends The "three Vs" of Big Data (plus two new Vs) How machine learning will help you making predictions The three most common problems with Neural

Networks and how to overcome them Even if you don't know anything about programming, Neural Networks is the perfect place to start now. Still, if you already know about programming but not about how to do it in Artificial Intelligence, neural networks are the next thing you want to learn. And Neural Networks for Beginners is the best way to do it. Download Neural Network for Beginners now to get the best start for your journey to Artificial Intelligence. Scroll

Walter de Gruyter GmbH & Co KG Structures, Seventh Edition, offers single-volume coverage of all major topics in structural analysis and design. Focusing on how structures really work, the text discusses concepts from both engineering and architectural perspectives, exploring structural behavior, structural analysis, and design within a building context.

Homilies Springer
Humble beans are the true MVPs of the kitchen. They have a long shelf life, are

packed with protein, and best of all, they taste great in a wide variety of applications. This collection of 20 foolproof recipes gives beans their due, putting them center stage in recipes such as Ultracreamy Hummus (you've never had homemade hummus this velvety-smooth) and White Bean and Tuna Salad (two pantry-friendly ingredients come together for a dish that's greater than the sum of its parts). We share the secrets to making light and crispy Falafel as well as irresistible soups and sides. Whether you're looking for breakfast inspiration (our recipe for Scrambled Eggs with Pinto Beans and Cotija Cheese delivers tender eggs with a mildly spicy kick), internationally inspired

mains such as Palak Dal (Spinach Dal with Cumin and Mustard Seeds) and Tuscan Shrimp and Beans, or hearty vegetarian dishes such as Black Bean Burgers and Meatless "Meat" Sauce with Chickpeas and Mushrooms, this collection gives you 20 great reasons to put beans on the menu.

Brimming with evocative storytelling and hundreds of photographs showcasing handsome interiors and stunning landscapes, this book features 25 stories from solo travelers, couples,

and families who traded the comforts of a rooted life for ever-changing vistas and eye-opening experiences. You'll meet a family exploring Australia in a cozy vintage camper filled with plants and natural wood finishes; a young couple designing a modern trailer inspired by the colors and textures of the high desert; a husband and wife living in a chic Airstream with green velvet seating, floral wallpaper, and herringbone wood floors. Balancing style with function, each carefully crafted tiny home is the result of long-held dreams, ingenuity, and imagination. Integrating Renewables in Electricity Markets This addition to the ISOR series addresses the analytics of the

operations of electric energy systems with increasing penetration of stochastic renewable production facilities, such as wind- and solar-based generation units. As stochastic renewable production units become ubiquitous throughout electric energy systems, an increasing level of flexible backup provided by non-stochastic units and other system agents is needed if supply security and quality are to be maintained. Within the context above, this book provides up-to-date analytical tools to address challenging operational problems such as:

- The modeling and forecasting of stochastic renewable power production.
- The characterization of the impact of

renewable production on market outcomes.

- The clearing of electricity markets with high penetration of stochastic renewable units.
- The development of mechanisms to counteract the variability and unpredictability of stochastic renewable units so that supply security is not at risk.
- The trading of the electric energy produced by stochastic renewable producers.
- The association of a number of electricity production facilities, stochastic and others, to increase their competitive edge in the electricity market.
- The development of procedures to enable demand response and to facilitate the integration of stochastic renewable units. This book is

written in a modular and tutorial manner and includes many illustrative examples to facilitate its comprehension. It is intended for advanced undergraduate and graduate students in the fields of electric energy systems, applied mathematics and economics. Practitioners in the electric energy sector will benefit as well from the concepts and techniques explained in this book.

Kissing Madeline
Cambridge
University Press

The eleven essays included in this collective volume examine a range of textual genres produced by Christians and Muslims throughout the

Mediterranean, including materials from the Corpus Islamolatinum, Christian propaganda and polemical works targeting Muslims and Jews, Inquisition records, and Christian and Muslim sermons. Despite the diversity of the works under consideration and the variety of methodological and disciplinary approaches employed in their analysis, the volume is bound together by the common goals of exploring the propaganda strategies premodern authors

deployed for specific aims, be it the unification of religious, cultural, and political groups through discourses of self-representation, or the invention of the political, cultural, religious, or gendered other. Many of the essays offer critical re-readings of works that are obscure or have never been studied, while others shed new light on the cultural and textual interactions between Christians, Muslims and Jews. The volume is divided into four sections, the first of which is comprised

of three chapters on the Corpus Islamolatinum that furnish new evidence showing the important role this “encyclopedia” played in spreading knowledge about Islam and contributing to the creation of propaganda and polemics against Islam among European intellectual circles. The chapters in section two offer novel interpretations of the hermeneutical strategies underlying the composition of polemical works such as the lives of

Muhammad and Pedro de la Cavalleria’s *Zelus Christi*. The essays in section three identify some common hermeneutical strategies in the use of anti-Jewish and anti-Islamic arguments to polemicize against religious others or edify Christians and illuminate intertextual relations between authors and genres (*disputatio* and *praedicatio*). Finally, section four introduces the gender perspective: the generated nature of the accusations of Judaizing in the analysis of the

transcripts of the inquisitorial court of three sisters who were tried in Barcelona in 1496, on the one hand, and two studies that explore the constructions of identities and gender relations reflected in various Islamic sources from opposite ends of the Mediterranean. They offer glimpses of women as subject (s) and as object (s) of preaching and show how such texts can reify or subvert traditional binary gender roles.

 This book presents essays by eminent scholars from across the history of medicine, early European history, including those expert on the history of the book. The volume honors Professor Nancy Siraisi and reflects the impact that Siraisi's scholarship has had on a range of fields. Contributions address several topics ranging from the medical provenance of biblical commentary to the

early modern emergence of pathological medicine. Along the way, readers may learn of the purchasing habits of physician-book collectors, the writing of history and the development of natural history. Modeling the interdisciplinary approaches championed by Siraisi, this volume attests to the enduring value of her scholarship while also highlighting critical areas of future research. Those with an interest in the history of science, the history

of medicine and all related fields will find this work a stimulating and rewarding read. Propaganda and (un)covered identities in treatises and sermons: Christians, Jews, and Muslims in the premodern Mediterranean No Starch Press "This volume presents a revised Greek text and the first English translation of the seven complete homilies that have survived from the pen of Sophronios, the seventh-century patriarch of Jerusalem. The seven surviving sermons were composed for feast days over the course of the Church year. They vary in length, at least in their current form, from a brief three pages for the

feast of Saints Peter and Paul to a rather massive thirty-five pages for the Annunciation. In addition to the evidence from two fragments, it is likely that he delivered other sermons during his patriarchate that have not come down to us"-- Desiccant-Assisted Cooling ArsipKoran.Com Mar í u saga, the Old Norse-Icelandic life of the Virgin Mary, survives in nineteen manuscripts. While the 1871 edition of the saga provides two versions based on multiple manuscripts and prints significant variants in the notes, it does not preserve the literary and social contexts of those manuscripts. In the extant manuscripts Mar í u saga rarely exists in the codex by

itself. This study restores the saga to its manuscript contexts in order to better understand the meaning of the text within its manuscript matrix, why it was copied in the specific manuscripts it was, and how it was read and used by the different communities that preserved the manuscripts.
