Contemporary Mexico faces a complex crisis of violence and insecurity with high levels of impunity and the lack of an effective rule of law. These weaknesses in the rule of law are multidimensional and involve elements of institutional design, the specific content of the laws, particularities of political competition and a culture of legality in a country with severe social inequalities. This book discusses necessary institutional and legal reforms to develop the rule of law in a context of democratic, social and economic transformations. The chapters are organized to address: 1) The concept of the ‘rule of law’ and its measurement; 2) The fragility of the ‘rule of law’ in Mexico; 3) Structural reforms and implementation challenges; 4) Social exclusion and the culture of legality. The book addresses decision-makers, civil servants, consultants, scholars, lecturers, and students focusing on public policy, rule of law, sociology of law, legislative studies and practice,

impunity, and areas of political philosophy. • The book presents an interdisciplinary and integrated approach for understanding the rule of law in Mexico, taking into account national particularities, the regional context and global comparisons. • Chapters discuss recent institutional reforms in Mexico from a critical point of view and explore possible next steps to achieve effective implementation. • This book addresses the links between a weak rule of law and social phenomena like insecurity, violence, corruption and democratic deficits.

This book, first appearing in German in 2004 under the title *Spezielle Relativitätstheorie für Studienanfänger*, offers access to the special theory of relativity for readers with a background in mathematics and physics comparable to a high school honors degree. All mathematical and physical competence required beyond that level is gradually developed through the book, as more advanced topics are introduced. The full tensor formalism, however, is dispensed with as it would only be a burden for the problems to be dealt with. Eventually, a substantial and comprehensive treatise on special relativity emerges which, with its gray-shaded formulary, is an invaluable reference manual for students and scientists alike. Some crucial results are derived more than once with different approaches: the Lorentz transformation in one spatial direction three times, the Doppler formula four times, the Lorentz transformation in two directions twice; also twice the unification of electric and magnetic forces, the velocity addition formula, as well as the aberration formula. Beginners will be grateful to find several routes to the goal; moreover, for a theory like relativity, it is of fundamental importance to demonstrate that it is self-contained and without contradictions. In 1945 Britain was the world's leading designer and builder of aircraft - a world-class achievement that was not mere rhetoric. And what aircraft they were. The sleek Comet, the first jet airliner. The awesome delta-winged Vulcan, an intercontinental bomber that could be thrown about the sky like a fighter. The Hawker Hunter, the most beautiful fighter-jet ever built and the Lightning, which could zoom ten miles above the clouds in a couple of minutes and whose pilots rated flying it as better than sex. How did Britain so lose the plot that today there is not a single aircraft manufacturer of any significance in the country? What became of the great industry of de Havilland or Handley Page? And what was it like to be alive in that marvellous post-war moment when innovative new British aircraft made their debut, and pilots were the rock stars of the age? James Hamilton-

Paterson captures that season of glory in a compelling book that fuses his own memories of being a schoolboy plane spotter with a ruefully realistic history of British decline - its loss of self confidence and power. It is the story of great and charismatic machines and the men who flew them: heroes such as Bill Waterton, Neville Duke, John Derry and Bill Beaumont who took inconceivable risks, so that we could fly without a second thought.
