Asia's remarkable economic performance and transformation since the 1960s has shifted the center of global economic activity toward Asia, in particular toward the Association of Southeast Asian Nations (ASEAN) economies, the People's Republic of China, and India (collectively known as ACI). While these dynamic developing economies do not form any specific institutional group, they constitute very large economies and markets. These emerging Asian giants share common boundaries, opportunities, and challenges. Their trade, investment, production, and infrastructure already are significantly integrated and will become more so in the coming decades. This book focuses on the prospects and challenges for growth and transformation of the region's major and rapidly growing emerging economies to 2030. It examines the drivers of growth and development in the ACI economies and the factors that will affect the quality of development. It also explores the links among the ACI economies and how their links may shape regional and global competition and cooperation.

During the Meiji Era, of 1868-1912, British influence in Japan was stronger than that of any other foreign power. Although role models were sought from Englishmen and Scotsmen, whether diplomats, engineers, educators or philosophers, the first priority for the Japanese was to achieve a transfer of industrial and technical skills. As important customers, who brought good profits to British industry, the Japanese were accommodated when they

stipulated on awarding a contract that their own people should work in office, shipyard or factory. Much new research material discovered in Japan, England and Scotland has enabled the detailed examination of a relationship - with Britain as Senior and Japan as Junior partner - which lasted until 1914. It was on these foundations that Japan was able subsequently to build a great industrial nation.

Rayne, Sagan, Tameka, Kyle, and Andrew adjust to life in the apocalypse. Having failed to prevent it, they must pull their resources to turn back the tide and save Earth. This isn't going to be easy. They need to combine resistance forces, amass an army, and earn their place in the galactic-wide effort to stop the King of Cinder before he can further spread devastation. Somewhere in there, they need to convince Enki to grant them naces and technological aid to combat the extremely advanced Night Army. This presents its own set of obstacles for them to overcome. Luckily Xelan and The Brethren are there to help along the way. Recover. Regroup. Resist. This is the only way.
