This collection of essays reflects on the life and work of Ngugi wa Thiong'o, who celebrated his 80th birthday in 2018. Drawing from a wide range of contributors, including writers, critics, publishers and activists, the volume traces the emergence of Ngugi as a novelist in the early 1960s, his contribution to the African culture of letters at its moment of inception, and his global artistic life in the twenty-first century. Here we have both personal and critical reflections on the different phases of the writer's life: there are poems from friends and admirers, commentaries from his co-workers in public theatre in Kenya in the 1970s and 1980s, and from his political associates in the fight for democracy, and contributions on his role as an intellectual of decolonization, as well as his experiences in the global art world. Included also are essays on Ngugi's role outside the academy, in the world of education, community theatre, and activism. In addition to tributes from other authors who were influenced by Ngugi, the collection contains hitherto unknown materials that are appearing in English for the first time. Both a celebration of the writer, and a rethinking of his legacy, this book brings together three generations of Ngugi readers. We have memories and recollections from the people he worked with closely in the 1960s, the students that he taught at the University of Nairobi in the 1970s, his political associates during his exile in the 1980s, and the people who worked with him as he embarked on a new life and career in the United States in the 1990s. First-hand accounts reveal how Ngugi's life and work have intersected, and the multiple forces that have converged to make him one of the greatest writers to come out of Africa in the twentieth century. Simon Gikandi is Robert Schirmer Professor of English, Princeton University. He is President of the MLA and was editor of its journal PMLA, from 2011-2016. Ndirangu Wachanga is Professor of Media Studies and Information Science at the University of Wisconsin. He is also the authorized documentary biographer of Professors Ali A. Mazrui, Ngugi wa Thiong'o and Micere Mugo.

Phytochemicals are plant derived chemicals which may bestow health benefits when consumed,

whether medicinally or as part of a balanced diet. Given that plant foods are a major component of most diets worldwide, it is unsurprising that these foods represent the greatest source of phytochemicals for most people. Yet it is only relatively recently that due recognition has been given to the importance of phytochemicals in maintaining our health. New evidence for the role of specific plant food phytochemicals in protecting against the onset of diseases such as cancers and heart disease is continually being put forward. The increasing awareness of consumers of the link between diet and health has exponentially increased the number of scientific studies into the biological effects of these substances. The Handbook of Plant Food Phytochemicals provides a comprehensive overview of the occurrence, significance and factors affecting phytochemicals in plant foods. A key objective of the book is to critically evaluate these aspects. Evaluation of the evidence for and against the quantifiable health benefits being imparted as expressed in terms of the reduction in the risk of disease conferred through the consumption of foods that are rich in phytochemicals. With world-leading editors and contributors, the Handbook of Plant Food Phytochemicals is an invaluable, cutting-edge resource for food scientists, nutritionists and plant biochemists. It covers the processing techniques aimed at the production of phytochemical-rich foods which can have a role in disease prevention, making it ideal for both the food industry and those who are researching the health benefits of particular foods. Lecturers and advanced students will find it a helpful and readable guide to a constantly expanding subject area.
