[Caterpillar 3406 Engine Specifications | It Still Runs](#)

I have a 3406e Cat in a Pete 379. I have oil coming out of the radiator over flow! I just replaces the oil cooler. Could I have replaced it with another bad oil cooler? What other possibilities could be causing this to happen. My oil temp rises very fast and the oil psi is running around 50 to 60 when I am running down the road at 70.
