I'm working on a 3406e 5ek engine that died on the road. It has loss

of engine speed signal code in ecm. It also had intermitant battery code. I found some bad wires and repaired them and that code went away. When testing the cam sensor or crank sensor wit a ohm meter which of the three wires do you test?
Where is the crank position sensor on a 2ws 3406e located?
At back of gearbox whr drive shaft bolt on speed sensor does b thr....That's the vehicle speed sensor, not the engine speed sensor. The engine speed sensor is in the bell housing and read off the flywheel teeth. It could be a bad sensor, but they usually fail totally, not intermittently.
