School faculty member Inna Khazan pairs biofeedback techniques with mindfulness practice to address some of life's most common ailments—from anxiety and fear to stress and insomnia. She begins with a description of basic physiological information, explaining concepts such as breathing and overbreathing. In Part Two she dives into the practice of mindfulness. And in Part Three she zeroes in on applying this mind-body approach to an array of common problems. Khazan's approach outlines simple solutions for readers who want to improve the way they respond to challenges. She guides them through increasing their resilience and emotional flexibility while empowering them to take back control of their overall

health.

Introducing the book "Human Anatomy and Physiology-II" is something that fills me with an incredible amount of joy. The content of this book has been meticulously

crafted to adhere to the curriculum for Bachelor of Pharmacy students that have been outlined by the Pharmacy Council of India. An effort has been made to investigate the topic using terminology that is as straightforward as possible in order to make it more simply digestible for pupils. The book has a number of illustrations, such as flowcharts and diagrams that make it simple for students to comprehend complex ideas. It is the author's honest desire that both students and academicians would take something helpful away from reading this book. I am hoping that both the students and the teachers will have positive reactions to this book. We are open to hearing recommendations regarding any and
