This paper provides an
overview of the federal
sentencing system. For

historical context, it first briefly discusses the evolution of federal sentencing during the past four decades, including the landmark passage of the Sentencing Reform Act of 1984 (SRA),¹ in which Congress established a new federal sentencing system based primarily on sentencing guidelines, as well as key Supreme Court decisions concerning the guidelines. It then describes the nature of federal sentences today and the

process by which such sentences are imposed. The final parts of this paper address appellate review of sentences; the revocation of offenders' terms of probation and supervised release; the process whereby the United States Sentencing Commission (the Commission) amends the guidelines; and the Commission's collection and analysis of sentencing data.
