This paper provides an overview of the federal sentencing system.

For historical context, it first briefly discusses the evolution of federal sentencing during the past four decades, including the landmark passage of the

Sentencing Reform Act of 1984 (SRA),¹ in which Congress

established a new federal sentencing system based primarily on

sentencing guidelines, as well as key Supreme Court decisions concerning the guidelines. It

then describes the nature of federal sentences today and the process by which such

sentences are imposed. The final parts of this paper address

appellate review of sentences; the revocation of offenders' terms of probation and supervised

release; the process whereby the United States Sentencing

Commission (the Commission)

amends the guidelines; and the Commission's collection and analysis of sentencing data.
