*Quia - Section 36.2: The Muscular System*

The muscular

system is a complex network of muscles vital to the human body. Muscles play a part in everything you do. They control your heartbeat and breathing, help digestion, and allow movement....

Human Muscular System

Worksheets - Kiddy Math

The body has 3 main types of muscle tissue.

1) Skeletal, 2) Smooth, and 3) Cardiac. Skeletal muscles attach to and move bones by contracting and relaxing in response to voluntary messages from the nervous system.

---

Skeletal muscle tissue is composed of long cells called muscle fibers that have a striated appearance.

system allows the body to move voluntarily, but it also controls involuntary movements of other organ systems such as heartbeat in the circulatory system and peristaltic waves in the digestive system. It consists of over six hundred skeletal muscles, as well as the heart muscle, the smooth muscles that surround your entire alimentary canal, and all your arterial blood vessels (Figure 2.9. 1 ).

Muscular System  
Biology Answer Key  
The muscular system is the biological system of humans that produces movement. The muscular system, in vertebrates, is controlled through

the nervous system, although some muscles, like cardiac muscle, can be completely autonomous.
