Development. Model 251 engine design was initiated in 1949, and like the 244 engine it would have a bore (cylinder diameter) of 9 inches (229 mm), and a stroke of 10.5 inches (267 mm). Its designation combines Alco's identifier for that bore and stroke - 2 - with the year its design was approved for laboratory testing - 1951. Chief Engineer of Diesel Engine Design, Paul Vaughan, designed the ...

Every ReCon engine is completely disassembled down to the last nut and bolt, thoroughly cleaned, inspected and fitted with new parts as needed. Critical wear parts such as rings, bearings, seals and gaskets are replaced with genuine new Cummins parts. After final assembly, computerized engine test cells guarantee like-new performance.
