motion picture. It was a dark and stormy night; Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem. A Wrinkle in Time is the winner of the 1963 Newbery Medal. It is the first book in The Time Quintet, which consists of A Wrinkle in Time, A Wind in the Door, A Swiftly Tilting Planet, Many Waters, and An Acceptable Time. A Wrinkle in Time is now a movie from Disney, directed by Ava DuVernay, starring Storm Reid, Oprah Winfrey, Reese Witherspoon and Mindy Kaling. This title has Common Core connections. Books by

The central idea of this book is that saving energy and water saves the households money and simultaneously help reduce greenhouse gas emissions that cause global warming. It also aims to give readers better understanding of the green concept to enable informed participation in the current discourse pertaining to environment and climate change. The first chapter reviews environmental issues confronting the world in general and the U.S. in particular. Chapter 2 discusses federal energy efficiency programs that relate directly with energy saving and resource conservation efforts in households. Chapter 3 focuses on

---

measures of saving energy at home including use of compact fluorescent lamps, taking advantage of residual heat in electric stoves, energy-efficient ways of using kitchen appliances, informed choice and use of home heating and cooling systems and others. Chapter 4 deals with conserving water inside and outside homes including use of high-efficiency toilets, low-flow shower heads, etc. The economics of energy and water use efficiency, covered in Chapter 5, quantifies the savings derived from most of the measures discussed in Chapters 3 and 4. The goal is to show in dollar terms how much households could save by following green practices at home. The challenges of dealing with solid waste from households are examined in Chapter 6. Particular focus is given on "Pay-As-You-Throw" (PAYT) scheme in waste collection systems and fees as well as the three Rs in waste management - Reduce, Reuse and Recycle. Recognizing the impact of children on energy and water use at home, the author devotes Chapter 7 on educating and engaging children in green practices. Two framework proposals aimed at enhancing sustainability of green movement in the country are presented in Chapter 8 including establishment of green camps and providing tax incentives for going green at home. Proposal for establishing green camps is directed to private

---

business sector or non-profit organizations and the government while the tax incentive proposal is directed solely to the government.

This book focuses on the emerging historical relations between British television and film culture in the 1950s. Drawing upon archival research, it does this by exploring the development of the early cinema programme on television - principally Current Release (BBC, 1952-3), Picture Parade (BBC, 1956) and Film Fanfare (ABC, 1956-7) - and argues

---

that it was these texts which played the unique to this decade. central role in the developing relations between the media. Particularly when it comes to Britain, the early co-existence of television and cinema has been seen as hostile and antagonistic, but in situating these programmes within the contexts of their institutional production, aesthetic construction and reception, the book aims to 'reconstruct' television's coverage of the cinema as crucial to the fabric of British film and television culture at the time. It demonstrates how the roles of cinema and television - as media industries and cultural forms, but crucially as sites of screen entertainment - effectively came together at this time in such a way that

“ A searing and emotionally gripping account of a young black girl growing up to become a strong black woman during the most difficult time of racial segregation. ” —Professor Charles Ogletree, Harvard Law School

“ Provides important context for an important moment in America ’ s history. ” —Associated Press When fourteen-year-old Carlotta Walls walked up the stairs of Little Rock Central High School on September 25, 1957, she and eight other black students only wanted to make it to class. But the journey of the “ Little Rock Nine, ” as they came to be known, would lead the nation on an even longer and much more turbulent path,

one that would challenge prevailing attitudes, break down barriers, and forever change the landscape of America. For Carlotta and the eight other children, simply getting through the door of this admired academic institution involved angry mobs, racist elected officials, and intervention by President Dwight D. Eisenhower, who was forced to send in the 101st Airborne to escort the Nine into the building. But entry was simply the first of many trials. Breaking her silence at last and sharing her story for the first time, Carlotta Walls has written an engrossing memoir that is a testament not only to the power of a single person to make a difference but also to the sacrifices made by families and

communities that found themselves a part of history.

Degrees of reiki is guide to the use and practice of Reiki. It offers a variety of ways of using Reiki that will encourage the reader to use their own intuition when applying reiki to their particular needs. It is not a complete work as Reiki is beyond being confined to one way or practice and is far greater than what can be understood and encompassed by one person. However it is hoped that this book will extend the reader`s knowledge and use of reiki and open their minds to the vast possibilities that Reiki offers.

This book covers the life and 60-year

career of Prof. Benjamin Lax (1915-2015), a preeminent physicist at the Massachusetts Institute of Technology (MIT), who played major roles in the development and applications of solid state and plasma physics. In an extensive series of autobiographical interviews, Lax describes the challenges he overcame, the opportunities he embraced, and the many outstanding research physicists he recruited, mentored, and interacted with. He includes both personal and professional reminiscences. Lax begins with his earliest memories of his childhood in Hungary. He recalls the immigration of his family to America and his education in New York City. He describes his Army service as a Radar

---

Officer at the MIT Radiation Laboratory during World War II. He covers his graduate education in physics at MIT, and his building up the semiconductor and ferrite research groups at MIT Lincoln Laboratory in the 1950s. He describes the origins and accomplishments of the MIT Francis Bitter National Magnet Laboratory, of which he was the founding Director, and recalls his tenure as professor in the MIT physics department. Features: Provides a valuable insight into a 60-year career in physics at one of the world's major research universities, the Massachusetts Institute of Technology Explores the organization, funding, and conduct of solid state physics research in the second half of

"This final volume in the four-volume commentary, *The Message of Acts in Codex Bezae*, continues the comparison of the message of Acts transmitted by Codex Bezae with that of the more familiar Alexandrian text, represented by Codex Vaticanus. For each section of Acts, there is a side by side translation of the Bezan and

Alexandrian manuscripts, followed by a critical apparatus and, finally, a commentary that explores the variations in the message of the two texts. Working from this strong methodological foundation Jenny Read-Heimerdinger and Josep Rius-Camps conclude that the Bezan text is the earlier of the two. In the process they provide an illuminating and comprehensive guide to the Acts of the Apostles." --Book Jacket.

This book provides the first comprehensive overview of the syntax of old Romanian written in English and targeted at a non-Romanian readership. It draws on an extensive new corpus analysis of the period between the beginning of the sixteenth century, the date of the earliest attested Romanian texts, and the end of the eighteenth century, generally considered to mark the start of the modernization of Romanian. Gabriela

---

Pan Dindelegan and her co-authors adopt both a synchronic and diachronic approach by providing a detailed corpus analysis in a given period, while also comparing old and modern Romanian. They examine the evolution of a variety of syntactic phenomena, including the elimination or diminishing of certain facts or generalization of others, the total or partial grammaticalization of phenomena, competition between structures, and cases of syntactic variation. The book takes a typological and comparative perspective, focusing on those phenomena that are considered specific to Romanian (either on the Romance or in the Balkan area), and adopts a modern framework while still

remaining accessible to readers from any background.
