First published in 1978, Reading Greek has become a best-selling one-year introductory course in ancient Greek for students and adults. It combines the best of modern and traditional language-learning techniques and is used widely in schools, summer schools and universities across the world. It has also been translated into several foreign languages. This volume contains a narrative adapted entirely from ancient authors, including Herodotus, Euripides, Aristophanes and Demosthenes, in order to encourage students rapidly to develop their reading skills. Generous support is provided with vocabulary. At the same time, through the texts and numerous illustrations, students will receive a good introduction to Greek culture, and especially that of Classical Athens. The accompanying Grammar and Exercises volume provides full grammatical support together with numerous exercises at different levels, Greek-English and English-Greek vocabularies, a substantial reference grammar and language surveys.

Degrees of reiki is guide to the use and practice of Reiki. It offers a variety of ways of using Reiki that will encourage the reader to use their own intuition when applying reiki to their particular needs. It is not a complete work as Reiki is beyond being confined to one way or practice and is far greater than what can be understood and encompassed by one person. However it is hoped that this book will extend the reader's knowledge and use of reiki and open their minds to the vast possibilities that Reiki offers.

This book focuses on the emerging historical relations between British television and film culture in the 1950s. Drawing upon archival research, it does this by exploring the development of the early cinema programme on television - principally Current Release (BBC, 1952-3), Picture Parade (BBC, 1956) and Film Fanfare (ABC, 1956-7) - and argues that it was these texts which played the central role in the developing relations between the media. Particularly when it comes to Britain, the early co-existence of television and cinema has been seen as hostile and antagonistic, but in situating these programmes within the contexts of their institutional production, aesthetic construction and reception, the book aims to 'reconstruct' television's coverage of the cinema as crucial to the fabric of British film and television culture at the time. It demonstrates how the roles of cinema and television - as media industries and cultural forms, but crucially as sites of screen entertainment - effectively came together at this time in such a way that is unique to this decade.

“ A searing and emotionally gripping account of a young black girl growing up to become a strong black woman during the most difficult time of racial segregation. ” —Professor Charles Ogletree, Harvard Law School “ Provides important context for an important moment in America ' s history. ” —Associated Press When fourteen-year-old Carlotta Walls walked up the stairs of Little Rock Central High School on September 25, 1957, she and eight other black students only wanted to make it to class. But the journey of the “ Little Rock Nine, ” as they came to be known, would lead the nation on an even longer and much more turbulent path, one that would challenge prevailing attitudes, break down barriers, and forever change the landscape of America. For Carlotta and the eight other children, simply getting through the door of this admired academic institution involved angry mobs, racist elected officials, and intervention by President Dwight D. Eisenhower, who was forced to send in the 101st Airborne to escort the Nine into the building. But entry was simply the first of many trials. Breaking her silence at last and sharing her story for the first time, Carlotta Walls has written an engrossing memoir that is a testament not only to the power of a single person to make a difference but also to the sacrifices made by families and communities that found themselves a part of history.

This is the final volume in the justifiably lauded four-volume commentary on the Book of Acts, presenting a fresh look at the text of Codex Bezae and comparing its message with that of the more familiar Alexandrian text - of which the Codex Vaticanus is taken as a representative. Where Codex Bezae is lacunary (after 22.29), other manuscripts that often support Bezan readings elsewhere are employed. Although based on the Greek text, the commentary aims to be accessible to those who are not familiar with Greek. It is intended to publish the entire Greek text of Codex Bezae following the publication of this fourth volume. The fourth volume addresses Acts 18.24-28.31, the chapters that cover the trial of Paul and the last stage of the mission to the Gentiles, culminating in Paul's unhindered proclamation of the gospel in Rome. For each section, there is a side by side translation of the Vaticanus and Bezan manuscripts (or related alternatives after 22.29), followed by a full critical apparatus which deals with more technical matters, and finally, a commentary which explores in detail the differences in the message of the two texts. Of particular interest in this part of Acts is the evaluation made by the author of Paul's defence at his successive trials which, it is argued, is considerably less favourable than is commonly assumed.

This book covers the life and 60-year career of Prof. Benjamin Lax (1915-2015), a preeminent physicist at the Massachusetts Institute of Technology (MIT), who played major roles in the development and applications of solid state and plasma physics. In an extensive series of autobiographical interviews, Lax describes the challenges he overcame, the opportunities he embraced, and the many outstanding research physicists he recruited, mentored, and interacted with. He includes both personal and professional reminiscences. Lax begins with his earliest memories of his childhood in Hungary. He recalls the immigration of his family to America and his education in New York City. He describes his Army service as a Radar Officer at the MIT Radiation Laboratory during World War II. He covers his graduate education in physics at MIT, and his building up the semiconductor and ferrite research groups at MIT Lincoln Laboratory in the 1950s. He describes the origins and accomplishments of the MIT Francis Bitter National Magnet Laboratory, of which he was the founding Director, and recalls his tenure as professor in the MIT physics department. Features: Provides a valuable insight into a 60-year career in physics at one of the world ' s major research universities, the Massachusetts Institute of Technology Explores the organization, funding, and conduct of solid state physics research in the second half of the twentieth century Includes a complete bibliography of Lax ' s publications in an on-line supplement [AIAA 2nd Aircraft Design and Operations Meeting, Los Angeles, California, July 20-22, 1970](#) A&C Black

This book provides the first comprehensive overview of the syntax of old Romanian written in English and targeted at a non-Romanian readership. It draws on an extensive new corpus analysis of the period between the beginning of the sixteenth century, the date of the earliest attested Romanian texts, and the end of the eighteenth century, generally considered to mark the start of the modernization of Romanian. Gabriela Pan Dindelegan and her co-authors adopt both a

synchronic and diachronic approach by providing a detailed corpus analysis in a given period, while also comparing old and modern Romanian. They examine the evolution of a variety of syntactic phenomena, including the elimination or diminishing of certain facts or generalization of others, the total or partial grammaticalization of phenomena, competition between structures, and cases of syntactic variation. The book takes a typological and comparative perspective, focusing on those phenomena that are considered specific to Romanian (either on the Romance or in the Balkan area), and adopts a modern framework while still remaining accessible to readers from any background.

Translation of the first grand synthesis of classic Chinese thought. This is a translation, with a commentary and a long contextualizing introduction, of the only major work of Han (206 B.C. to 220 A.D.) philosophy that is still available in complete form. It is the first translation of the work into a European language and provides unique access to this formative period in Chinese history. Because Yang Hsiung's interpretations drew upon a variety of pre-Han sources and then dominated Confucian learning until the twelfth century, this text is also a valuable resource on early Chinese history, philosophy, and culture beyond the Han period. The *T'ai hsü an* is also one of the world's great philosophic poems comparable in scale and grandeur to Lucretius' *De rerum naturum*. Nathan Sivin has written that this is one of the titles on the short list of Chinese books every cultivated person should read. Han thinkers saw in this text a compelling restatement of Confucian doctrine that addressed the major objections posed by rival schools including Mohism, Taoism, Legalism and Yin-Yang Five Phase Theory. Since this Han amalgam formed the basis for the state ideology of China from 134 B.C. to 1911, an ideology that in turn provided the intellectual foundations for the Japanese and Korean states, the importance of this book can hardly be overestimated.

Madeleine L'Engle's ground-breaking science fiction and fantasy classic, now a major motion picture. It was a dark and stormy night; Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. *A Wrinkle in Time*, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem. *A Wrinkle in Time* is the winner of the 1963 Newbery Medal. It is the first book in *The Time Quintet*, which consists of *A Wrinkle in Time*, *A Wind in the Door*, *A Swiftly Tilting Planet*, *Many Waters*, and *An Acceptable Time*. *A Wrinkle in Time* is now a movie from Disney, directed by Ava DuVernay, starring Storm Reid, Oprah Winfrey, Reese Witherspoon and Mindy Kaling.
