Lu again provides an authoritative and comprehensive look at the entire Mac family, including its design philosophy, architecture, hardware and software options and significant user issues.

Microtimes World Scientific

Networking Infrastructure for Pervasive Computing: Enabling Technologies & Systems is a comprehensive guide to tomorrow's world of ubiquitous computing where users can access and manipulate information from everywhere at all times. The emphasis is on networking, systems and standards rather than detailed physical implementation. Addressed are many technical obstacles, such as, connectivity, levels of service, performance, and reliability and fairness. The authors also describe the existing enabling off-the-shelf technologies and its underlying infrastructure known as pervasive networking (PervNet). PervNet ties different sets of smart nodes together enabling them to communicate with each other to provide pervasive computing services to users. Throughout the book, important issues related to scalability, transparency, security, energy management, QoS provisioning, fault tolerance, and

disconnected operations are discussed. This work provides a research and development perspective to the field of PervNet and will serve as an essential reference for network designers, operators and developers. **Networking Infrastructure for Pervasive Computing** This book is written for workforce developers in community colleges and branch campus settings. College administrators, public officials, and employers may also find it helpful because it will give them a frame of reference for directing--or judging the quality of--community college workforce developers, the functions they oversee, the results they obtain, and the services they offer. This book can also serve as a text for the many students who are preparing themselves for careers in the challenging world of workforce development in community colleges. The book is intended to cover key issues in workforce development. The fifteen chapters are: (1) "The Role of Workforce Development Organizations" (Laurance J. Warford); (2) "Strategic Business Planning for Workforce Development" (Frederick D. Loomis); (4) "Integrating Workforce Development and Institutional Requirements" (James Jacobs); (5) "Competencies for Workforce Developers" (William J. Rothwell and Patrick E. Gerity); (6) "Building Community Partnerships for Workforce Development" (Mary Gershwin); (7) "Marketing Workforce Development Organizations" (Paul Pierpoint); (8) "The 5-S Consultative Approach to Sales" (Wesley E. Donahue and John E. Park); (9) "Finance and Budgeting for Workforce Development Organizations" (Leslie Roe); (10) "Establishing and Maintaining Effective Relations with Workforce Development Faculty, Staff, and Administrators" (Dennis Bona); (11)

"Assessing Needs for Training and Nontraining Projects" (Elaine A. Gaertner and Cheryl A. Marshall); (12) "Integrating Complex Training and Nontraining Projects" (Ethan S. Sanders); (13) Evaluating Workforce Development Efforts (William J. Rothwell); (14) "Outsourcing Training" (Karen A. Flannery); and (15) "Lessons Learned and Emerging Issues" (Patrick E. Gerity). Appended are: (1) Developing a High-Performing Organization: Self-Assessment Instrument for Workforce Development Professionals in Higher Education; (2) Competency Model for Community College Workforce

Developers; (3) Competency Assessment Instrument for Community College Workforce Developers; (4) Templates for Conducting 5-S Consultative Sales; (5) Coaching Checksheet for Community College Workforce Developers; (6) Templates for Community College Workforce Developers; and (7) State-by-State Electronic Resources for Workforce Development Strategic Plans and Customized Job Training Grants. The book also contains a foreword by George R. Boggs and James McKenney; preface; information about the contributors, and an index.

In his new book, Microsoft chairman and CEO Bill Gates discusses how technology can help run businesses better today and how it will transform the nature of business in the near future. Gates stresses the need for managers to view technology not as overhead but as a strategic asset, and offers detailed examples from Microsoft, GM, Dell, and many other successful companies. The Apple Macintosh Book
The latest theoretical and empirical evidence on short selling in the United States and throughout the world To get the most success out of what the finance community regards as a risky business, short sellers need high-level information. The Theory and Practice of Short Selling offers managers and investors the information they need to maximize and enhance their short selling capabilities for bigger profits. Frank Fabozzi collects a group of market experts who share their knowledge on everything from the basics to the complex in the world of short sales, including mechanics of short selling, the empirical evidence on short-selling, the implications or restrictions on short selling for investment strategies, short-selling strategies pursued by institutional investors, and identifying short-selling candidates. Frank J. Fabozzi, PhD, CFA (New Hope, PA), is the Frederick Frank Adjunct Professor of Finance at Yale University's School of Management and Editor of the Journal of Portfolio Management. He is the author or editor of over 100 books on finance and investing.
