From the heart of The Velvet a writing community built around the fervent love of neo-noir fiction comes an original anthology. Stacked with brilliant emerging writers alongside some of the strongest established voices in contemporary literature, WARMED AND BOUND crosses literary boundaries on all sides, to deliver an altogether unique reading experience. Through seemingly opposed conventions, beautiful prose makes a hard impression on the short story form. From a scary love story to a nostalgic thriller, a hardboiled pursuit of salvation to the black humor that is existentialism, WARMED AND BOUND is rogue humility and lovesick noir, where humanity is a dirty puzzle. It 's Velvet Noir. Welcome. This book brings together aspects of statistics and machine learning to provide a comprehensive guide to evaluating, interpreting and understanding biometric data. It naturally leads to topics including data mining and prediction to be examined in detail. The book places an emphasis on the various performance measures available for biometric systems, what they mean, and when they should and should not be applied. The evaluation techniques are presented rigorously, however they are always accompanied by intuitive explanations. This is important for the increased acceptance of biometrics among non-technical decision makers, and ultimately the general public.

The Path to Salvation Crown

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank shects for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when me

say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend-ent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream- fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

Spanning the fifth century to the sixteenth, and ranging from Afghanistan to Spain, this unique collection provides a profound insight into the sheer vitality and depth of Classical Arabic literature. From the earliest surviving fragments of The Thousand and One Nights to the elegant beauty and profound power of the Qur'an - believed by the Islamic faith to contain the actual words of Allah - it includes translated extracts from all the major works of the period, alongside many less well-known but equally fascinating pieces. Exploring such traditional themes as lovesick yearning and fated doom, and considering subjects as diverse as the etiquette of falling in love with slave-girls and the terrors of the sea, this compelling anthology of poetry and prose brilliantly illuminates a body of writing that has been unjustly neglected by the west for centuries.

Gender Ideologies and Military Labor Markets in the U.S. offers a comprehensive analysis of the relationship between changes in military gender ideologies and structural changes in U.S. military and society. By investigating how social and military change have influenced gender ideologies, the author develops an approach that (re-)connects military gender ideologies to the social conditions of their production and distribution and explains their transformation as effects of changing social and political relations and conflicts. Examining the role of different groups of social actors, media debates on women ' s military participation and gender ideologies inherent in depictions of military women, the author seeks to contextualise these ideologies are within structural change in the U.S. military and society, relating them to the gender-specific division of labour on civilian and military labor markets. This work provides a deeper understanding of the nexus between military re-structuring processes, women ' s military integration, and changes of gender ideologies in regard to war and the military, and will be of great interest to students and scholars of gender, security studies and American politics.

A Historical Guide to Ernest Hemingway World Scientific

In the last quarter of the twentieth century, urban colleges and universities found themselves enveloped by the poverty, crime, and physical decline that afflicted American cities. Some institutions turned inward, trying to insulate themselves rather than address the problems in their own backyards. Others attempted to develop better community relations, though changes were hard to sustain.

Spurred by an unprecedented crime wave in 1996, University of Pennsylvania President Judith Rodin knew that the time for urgent action had arrived, and she set a new course of proactive community engagement for her university. Her dedication to the revitalization of West Philadelphia was guided by her role not only as president but also as a woman and a mother with a deep affection for her hometown. The goal was to build capacity back into a severely distressed inner-city neighborhood—educational capacity, retail capacity, quality-of-life capacity, and especially economic capacity—guided by the belief that "town and gown" could unite as one richly diverse community. Cities rely on their academic institutions as stable places of employment, cultural centers, civic partners, and concentrated populations of consumers for local business and services. And a competitive university demands a vibrant neighborhood to meet the needs of its faculty, staff, and students. In keeping with their mission, urban universities are uniquely positioned to lead their communities in revitalization efforts, yet this effort requires resolute persistence. During Rodin's administration (1994-2004), the Chronicle of Higher Education referred to Penn's progress as a "national model of constructive town-gown interaction and partnership." This book narrates the challenges, frustrations, and successes of Penn's campaign, and its prospects for long-term change.
