Canadian Civil Aircraft Register Earthscan A one-time murderer and many-time thief, Richard Lee McNair is the only person ever to break out jail, state penitentiary and federal penitentiary. Three escapes. McNair, a former US Air Force Sergeant, was 47 when he shipped himself out a Louisiana prison on the 5th of April, 2006. His escape came to within a whisker of failing when he was confronted on railroad tracks by a policeman, an event recorded by the officer's dashcam. The encounter became a famous crime video clip on YouTube. Month after month, McNair was featured on America's Most Wanted and led newspaper and television newscasts in the United States and Canada. Through more than 350 letters and 3,500 hand-written pages from his solitary-confinement cell at the 'Supermax' in Colorado, Richard McNair provides the never-before-known details on how he pulled

off his three escapes, his encounters with police, and what can be best described as a semi-paranoid life on the lam. His Houdini-like escape in 2006 was the first from a federal prison in 13 years, and there hasn't been one since. Is Richard Lee McNair the world's greatest escape artist? The reader can decide. **Training for the New Alpinism** Harry N. Abrams A Hands-on Guide To Getting The Most From Your Toyota. ABCs for Future Race Car Drivers Toyota

This comprehensive account of the past, present and future of the automobile examines the key trends, key technologies and key players involved in the race to develop clean, environmentally friendly vehicles that are affordable and that do not compromise on safety or design. Undertaking a rigorous interrogation of our global dependency on oil, the author demonstrates just how unwise and unnecessary this is in light of current developments such as the fuel cell revolution and the increasing viability of hybrid cars, which use both petrol and electricity - innovations that could signal a new era.

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in *Nikkei Sangyo Shimbun* (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983

edition of the *Topeka Capital-Journal* and the September 13, 1983 issue of the *Asian Wall Street Journal*. The *Topeka Capital-Journal* headline read, "MacArthur's Jeeps Were the Toyota Catalyst."

This book celebrates the most important collection of 17th-century Chinese porcelain in the world, assembled by the distinguished British diplomat Sir Michael Butler. His passion for porcelain is clearly reflected in the over eight hundred pieces he collected and lived with at his home and private museum in Dorset. The pots (as Sir Michael called them), many of extreme rarity or exquisite quality, give testimony to the incredible depth of knowledge he acquired over five decades and his outstanding contribution to research and education in this previously neglected field of study. This lavish and comprehensive collection covers most types of porcelain produced at Jingdezhen, in Jiangxi province, during the 17th century. The variety of the pieces carefully acquired by Sir Michael reflects the great innovative spirit of the highly skilled Jingdezhen potters and painters at a time when they were released from the controls of Imperial patronage, between the end of the reign of the Ming Emperor Wanli in 1620 and the re-establishment of the Imperial kilns by the Qing Emperor Kangxi in 1683. It is a study collection of porcelain unrivalled in its breadth and rarity that demonstrates the stylistic and qualitative evolution which occurred in Chinese porcelain production during the 17th century. An introduction written by Katharine Butler tells the fascinating story of the circumstances that encouraged her father to acquire, collect and passionately study Chinese porcelain of the 17th century; how he found rare pieces with dates, interesting inscriptions, seal marks or narrative scenes; and how the collection and his scholarly publications came to be internationally renowned. The core of the book is

composed of nine sections presenting the main categories of porcelains in the collection: Late Ming, High Transitional, Shunzhi, Early Kangxi, Mid-Late Kangxi, Monochromes and Famille Verte, as well as disputed pieces. Some of the highlights are the extremely rare High Transitional pieces painted only in overglaze enamels dating to the Chongzhen reign, c.1640-43; the first piece acquired by Sir Michael, a green enamel winepot, dating to the early Kangxi reign, c.1665-70; a group of rare dated Zhonghe Tang pieces painted in underglaze blue and red, and an early Kangxi basin finely painted in underglaze blue and red with a Master of the Rocks landscape, dating to c.1670-75. Leaping the Dragon Gate refers to the symbolic metamorphosis from a humble carp to a mighty dragon - the most powerful of the Four Divine Creatures - that a student would undergo on succeeding in the Jinshi or Imperial civil service examinations. Passing these examinations required years, sometimes decades, of enormous effort to acquire the requisite educational merit and success was very rare. It is a worthy metaphor for Sir Michael's scholarly achievement. This 384-page book with over 600 colour illustrations is a catalogue raisonné of almost his entire 17th century porcelain collection, including many previously unpublished pieces. In the spirit of keeping the family legacy of acquisition and scholarship alive, the authors have included a few important, recently purchased pieces and also have revised and expanded the list of all known dated pieces of 17th Century Chinese porcelain in the world that Sir Michael compiled in his 1992 USA exhibition catalogue.
