Setting Valves On A Diesel Engine Without A Manual

Mike, I think that the "John Deere" emblazoned across the top of the serial number tag is a far less subtle clue of its green origins than the yellow plastic oil filler cap... The turbo sounds like a great idea to deal with the exhaust manifold... I have the manual on the diesel Gator, it used the 3TN66C-Juv and EJUV engines at 18 HP.

There is a way without having a manual to adjust the engine valves on any inline diesel engine because of the universal design that makes it easy to carry out this procedure. This procedure is called the rocker method that uses the intake and exhaust valve position as a reference while turning over the engine by hand.

So I have been doing some research on how to add more power to the engine in a 332 and thats when I came across the Yanmar 3TN66C-EJUV. I found it interesting because it makes 22hp which is way more than what a 332 makes. And from what I could tell all of the rotating assembly in the engine is identical between the two motors the block also look basically identical.
