Volume Two of 'Imagine, A World Without DIS-EASE' is an autobiographical narrative of the Genesis II Church of Health and Healing told by the Co-founder, Mark S. Grenon. This Amazing Journey started back in 2006 where Mark , then a missionary pilot in the Dominican Republic was working with medical teams in the D.R. and in Haiti when he contracted MRSA, a staph infection along with his three sons while working as interpreters. The MRSA spread to all of his 8 children! Nothing worked to kill this infection. After months of using the 'latest and greatest' antibiotics known at that time, it was getting worse! In desperation to save his son, Jonathan's leg, he found a free eBook on the internet written by a miner named Jim Humble. That book, 'Breakthrough, The Miracle Mineral Supplement of the 21st Century' not only 'restored health' for him and his family from the MRSA but put him on a path that changed his life! Mark and his sons, Jonathan and Joseph went on to help hundreds in the D.R. and Haiti 'restore health' from many different illnesses such as: Diabetes, AIDS, Dengue, Gastritis, Cancer, to name just a few. In 2010, Jim Humble came to live with the Grenon Family at their mission compound in Barahona, D.R. where they founded the G2Church. The G2Church has grown today as of January 2020, to over 3,700 members in 145+ countries with 1997 Health Ministers, 115 Bishops and 252 Church Chapters. For the past 3 years, 10+ testimonies of 'restored health' from 95% of the illnesses in this world are coming in and being read in the free weekly G2Church Newsletter www.g2churchnews.org and on the weekly G2Voice Broadcast at: www.g2voice.is. This book will cover this incredible story starting in 2006 to 2014. May the Lord use this book to help many 'restore health!' Mark S. Grenon

This third edition maintains the standard for clarity and accessibility combined with rigor which was set in previous editions, making it suitable for a wide range of students. The text has been extensively updated, and this new edition includes: a new chapter devoted to attention and perception over 200 new references over 30 new figures and improved, more colorful, visual presentation a new companion website with a range of resources for students and lecturers The book contains a range of pedagogical features, including tutorial sections at the end of each chapter. This distinctive feature introduces areas of the subject which are rarely included in student texts, but are crucial for establishing a firm foundation of knowledge. Some tutorials are devoted to more advanced and technical topics (optics, light measurement, Bayesian inference), but treated in an accessible manner, while others cover topics a little outside of the mainstream (music perception, consciousness, visual art). *Foundations of Sensation and Perception* will enable the reader to achieve a firm grasp of current knowledge concerning the processes that underlie our perception of the world and will be an invaluable resource for those studying psychology, neuroscience, and related disciplines.
