Electric Field Analysis is both a student-friendly textbook and a valuable tool for engineers and physicists engaged in the design work of high-voltage insulation systems. The text begins by introducing the physical and mathematical fundamentals of electric fields, presenting problems from power and dielectric engineering to show how the theories are put into practice. The book then describes various techniques for electric field analysis and their significance in the validation of numerically computed results, as well as: Discusses finite difference, finite element, charge simulation, and surface charge simulation methods for the numerical computation of electric fields Provides case studies for electric field distribution in a cable termination, around a post insulator, in a condenser bushing, and around a gas-insulated substation (GIS) spacer Explores numerical field calculation for electric field optimization, demonstrating contour correction and examining the application of artificial neural networks Explains how high-voltage field optimization studies are carried out to meet the desired engineering needs Electric Field Analysis is accompanied by an easy-to-use yet comprehensive software for electric field computation. The software, along with a wealth of supporting content, is available for download with qualifying course adoption. [Schaum's Outline of Theory and Problems of Acoustics](#) Bentley Pub

Summer is deadly in the mountain community of Mason County, Virginia. Deputy Sheriff Tom Bridger and veterinarian Rachel Goddard are caught in a maelstrom of lies that stretch far into the past and suspicions that threaten the future. Cam and Meredith Taylor are murdered within hours of one another, and Rachel is dragged into the case because she heard but didn't see Cam's murder.

The Taylors arrived in Mason County as volunteers in the 1960s War on Poverty, and they stayed on, making loyal friends and bitter enemies. The victims' daughter is Tom's former girlfriend, Leslie. She returns home to see justice done and to win Tom back from Rachel. The prime suspect is newcomer Ben Hern, Rachel's childhood friend, and she is desperate to prove him innocent. Leslie pushes for Hern's arrest and launches a campaign of intimidation against Rachel. With the killer targeting Rachel and the community clamoring for an arrest, Tom and Rachel must decide who they can trust.

Electronic Diesel Control (EDC) Haynes Publications Keith McCord recounts the history of automotive onboard diagnostic systems and creation of the rudimentary OBD I systems and the development as well as the evolution of OBD II. Currently, OBD-II (OnBoard Diagnostic II) is the standard of the industry, and this book provides a thorough explanation of this system. It details its main features, capabilities, and characteristics. It shows how to access the port connector on the car, the serial data protocols, and what the serial data means. To understand the diagnostic codes, the numbering system is defined and the table of common DTCs is shown. But most

importantly, McCord provides a thorough process for trouble shooting problems, tracing a problem to its root, explaining why DTCs may not lead to the source of the underlying problem, and ultimately resolving the problem.

HISTORICAL FICTION BOOK OF THE MONTH - THE TIMES One night in autumn 1944, a gunshot echoes through the alleyways of a small town in occupied Poland. An S.S. officer is shot dead by a young Polish Jew, Margarita Ejzenstain. In retaliation, his commander orders the execution of thirty-seven Poles - one for every year of the dead man's life. The subcommissural organ is a secretory ependymo-glia structure of the brain. It secretes glycoproteins into the cerebrospinal fluid. The chemical nature of this material is only partly known, and the functional role of the entire circumventricular complex has remained enigmatic. New experimental models include transplantation, immunological blockade, and experimental and clinical hydrocephalus. This first book in the field containing provocative ideas will most likely stimulate further investigations into molecular

and systemic aspects of the problem.

The Subcommissural Organ MacLehose Press Winter 2020 issue of Salvage, featuring Andreas Malm, Helen Charman, James Meadway, Tessa McWatt, and many others.

That Hideous Strength includes a major essay from James Meadway on the late David Graeber's political economy and the lessons in it for today's left, Tessa McWatt on the Black Lives Matter uprisings of 2020, Benjamin Kunkel on the 2020 US Presidential election, Judy Thorne on femme excess and its necessity for planetary liberation, Ben Davis on the politics of online, James Foley on Scotland's Covid-19 response, and Alex Billet on contemporary Los Angeles.
