Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Refined and streamlined, SYSTEMS ANALYSIS AND DESIGN IN A CHANGING WORLD, 7E helps students develop the conceptual, technical, and managerial foundations for systems analysis design and implementation as well as project management principles for systems development. Using case driven techniques, the succinct 14-chapter text focuses on content that is key for success in today's market. The authors' highly effective presentation teaches both traditional (structured) and object-oriented (OO) approaches to systems analysis and design. The book highlights use cases, use diagrams, and use case descriptions required for a modeling approach, while demonstrating their application to traditional, web development, object-oriented, and service-oriented architecture approaches. The Seventh Edition's refined sequence of topics makes it easier to read and understand than ever. Regrouped analysis and design chapters provide more flexibility in course organization. Additionally, the text's running cases have been completely updated and now include a stronger focus on connectivity in applications. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Zeolite scientists, whether they are working in synthesis, catalysis, characterization or application development, use the Atlas of Zeolite Framework Types as a reference. It describes the main features of all of the confirmed zeolite framework structures, and gives references to the relevant primary structural literature. Since the last edition 34 more framwork types have been approved and are described in this new edition. A further new feature will be that characteristic building units will be listed for each of the framework types. Zeolites and their analogs are used as desiccants, as water softeners, as shape-selective acid catalysts, as molecular sieves, as concentrators of radioactive isotopes, as blood clotting agents, and even as additives to animal feeds. Recently, their suitability as hosts for nanometer spacing of atomic clusters has also been demonstrated. These diverse applications are a reflection of the fascinating structures of these microporous materials. Each time a new zeolite framework structure is reported, it is examined by the Structure Commission of the International Zeolite Association (IZA-SC), and if it is found to be unique and to conform to the IZA-SC's definition of a zeolite, it is assigned a 3-letter framework type code. This code is part of the official IUPAC nomenclature for microporous materials. The Atlas of Zeolite Framework Types is essentially a compilation of data for each of these confirmed framework types. These data include a stereo drawing showing the framework connectivity, features that characterize the idealized framework structure, a list of materials with this framework type, information on the type material that was used to establish the framework type, and stereo drawings of the pore openings of the type material. * Clear stereo drawings of each of the framework types * Description of the features of the framework type, allowing readers to quickly see if the framework type is suitable to their needs * References to isotypic materials, readers can quickly identify related materials and consult the appropriate reference

The Yearbook on Space Policy aims to be the reference publication analysing space policy developments. Each year it presents issues and trends in space policy and the space sector as a whole. Its scope is global and its perspective is European. The Yearbook also links space policy with other policy areas. It highlights specific events and issues, and provides useful insights, data and information on space activities. The Yearbook on Space Policy is edited by the European Space Policy Institute (ESPI) based in Vienna, Austria. It combines in-house research and contributions of members of the European Space Policy Research and Academic Network (ESPRAN), coordinated by ESPI. The Yearbook is designed for government decision-makers and agencies, industry professionals, as well as the service sectors, researchers and scientists and the interested public.

Moving to a new Amish settlement in small-town Colorado was a brave new start for independent-minded quiltmaker Esther Kiem. But helping her reckless relative will really put her special matchmaking skills to the test . . . Mischievous and rebellious, young Ben Kiem is making the wrong kind of name for himself throughout the town of Byler. And even though his sister-in-law, Esther, somehow coaxes him into keeping company with sensible Linda Eicher, Ben can't see anything they have in common. Or that he could ever be good enough for someone like her. But Linda's down-to-earth nature and unexpected understanding have Ben trying his best to be better, no matter how challenging . . . Linda couldn't be more surprised when Ben turns out to be caring and helpful, despite his rowdy pranks and bad-news friends. And falling in love with him suddenly seems just right. But when a heartbreaking misunderstanding comes between them, both she and Ben must risk enough to trust, stitch the pieces back together—and dare a forever precious happiness. The Turnagain Arm of the Cook Inlet in Alaska is bedded with solid mud. Glacial silt, volcanic ash, Beluga Whale carcass, and other mineral deposits lie and rot together to form dangerous mud flats. "Solid Mud" is a compilation of several different writing projects taken from Erik Kershner's notebooks and wallet notes between 1999 and 2002. No true beginning and no satisfactory end. No clear line between fiction and non-fiction. Here you will find unscientific information about the Cook Inlet's dangerous waters and mud flats. However if mud doesn't satisfy your reading bug you'll find many other short and unrelated bursts about Alaska in "Solid Mud." Read along as Mungo lightly uncovers the surface of what 'real world' Alaska has to offer, and then follow him onto rabbit trails of memories and ideas. Discover Mungo's trans-dimensional counterpart, Henry, and tag along on his corresponding journey through the fantasy land of Down Cancer where Tritus and other people with many things to hide make cross-country travel perilous.

Der Autor zeigt, inwieweit die Resultate gängiger Werbemitteltests mit Hilfe multivariater Verfahren so ausgewertet werden können, daß Ähnlichkeitsbeziehungen zwischen Werbemitteln visualisierbar sind und Gesamtbetrachtungen erfolgen können. Werbung dient in erster Linie dem Ziel, relative Wettbewerbsvorteile zu erreichen. In Theorie und Praxis der Werbekontrolle wird der Aspekt dieser relativen Wirkung jedoch kaum berücksichtigt. Manfred Schwaiger zeigt in diesem Buch, wie die Ergebnisse gängiger Werbemitteltests mit Hilfe multivariater Analysemethoden so ausgewertet werden können, daß Ähnlichkeitsbeziehungen sichtbar und Gesamtbetrachtungen anstelle von Ausschnittsanalysen möglich werden. Darüber hinaus weist der Autor anhand ausgewählter Fallbeispiele nach, inwieweit zweimodale Clusteranalysen, Repräsentationstechniken und Idealpunktmodelle zu einer effizienten Werbe-wirkungskontrolle beitragen können.

One woman's solo journey to ride all seven continents on two wheelsWelsh girl Steph Jeavons ran away to see the world. She wanted to see the sunset from every angle. She wanted to see an orangutan and a baobab tree. She wanted to become the first person to circumnavigate the globe and ride a motorcycle on all seven continents - and to sing karaoke on the way.Steph's cravings for escapism manifest themselves in many ways throughout her life. The book begins in her late teens where she finds herself in prison by the age of twenty. She knows there is a whole world beyond that razor wire just calling out to be explored. Twenty years later, and armed only with a stern tone of voice she reserves for naughty dogs, drunk Turks, Iranian taxi drivers, semi-conscious British soldiers and Saudi truckers, she rides her trusty steed Rhonda the Honda solo around the world, to the highest, driest, wettest, hottest and coldest corners of the earth. This is a powerful and honest memoir written from the perspective of a liberated single woman taking on the world with a dogged determination to complete her mission at all costs.Home by Seven is told with honesty and wit and from a unique perspective.

The microcirculation of the gastrointestinal tract is under the control of both myogenic and metabolic regulatory systems. The myogenic mechanism contributes to basal vascular tone and the regulation of transmural pressure, while the metabolic mechanism is responsible for maintaining an appropriate balance between O2 demand and O2 delivery. In the postprandial state, hydrolytic products of food digestion elicit a hyperemia, which serves to meet the increased O2 demand of nutrient assimilation. Metabolically linked factors (e.g., tissue pO2, adenosine) are primarily responsible for this functional hyperemia. The fenestrated capillaries of the gastrointestinal mucosa are relatively permeable to small hydrolytic products of food digestion (e.g., glucose), yet restrict the transcapillary movement of larger molecules (e.g., albumin). This allows for the absorption of hydrolytic products of food digestion without compromising the oncotic pressure gradient governing transcapillary fluid movement and edema formation. The gastrointestinal microcirculation is also an important component of the mucosal defense system whose function is to prevent (and rapidly repair) inadvertent epithelial injury by potentially noxious constituents of chyme. Two pathological conditions in which the gastrointestinal circulation plays an important role are ischemia/reperfusion and chronic portal hypertension. Ischemia/reperfusion results in mucosal edema and disruption of the epithelium due, in part, to an inflammatory response (e.g., increase in capillary permeability to macromolecules and neutrophil infiltration). Chronic portal hypertension results in an increase in gastrointestinal blood flow due to an imbalance in vasodilator and vasoconstrictor influences on the microcirculation. Zeolite synthesis is an active field of research. As long as this continues, new phases will be discovered and new techniques for preparing existing phases will appear. This edition of Verified Synthesis of Zeolitic Materials contains all the recipes from the first edition plus 24 new recipes. Five new introductory articles have been included plus those from the first edition, some of which have been substantially revised. The XRD patterns have been recorded using different instrument settings from those in the first edition and are intended to conform to typical X-ray diffraction practice. In most cases, only the XRD pattern for the productas synthesised is printed here. The exceptions are those phases which show marked changes in the XRD pattern upon calcination.
