At last. A practical handbook on how to choose  
and operate datalogging equipment and get the  
full benefit from what it tells you. Aimed at the  
amateur competitor, it covers hardware and  
software and takes over where the manufacturers  
instructions run out. It shows how to understand  
what the data is telling you and how to use it to  
go faster. It covers standard information screens  
and shows you how to create your own charts  
and tables that will illuminate the performance of  
both the car, the driver and the team. On the  
way, it deals with systems management issues,  
how to get the quick and easy payoffs, and how  
to benefit in the long term. It explains how  
sensors work, how to fit them so they survive and  
to calibrate them. The final chapter is a Field  
Guide designed to help you run the system,  
trouble-shoot hardware and software problems  
and quickly interpret the output of the graphs  
under pressure during an event.
