Senate Documents Vasanth Simon

An updated and revised edition of the standard work on the use of critical path methods (CPM) in the construction industry. Describes the mechanics and procedures of CPM in construction planning and works control and demonstrates its application to large and small projects alike. Emphasis is not on the mathematics--the stress here is on the solution of problems commonly encountered in construction practice.

*Annual Report* Frontiers Media SA

This book analyses the interpretation of environmental offences contained in the waste, contaminated land, and habitats' protection regimes. It concludes that the current purposive

approach to interpretation has produced an unacceptable degree of uncertainty. Such uncertainty threatens compliance with rule of law values, inhibits predictability, and therefore produces a scenario which is unacceptable to the wider legal and business community. The author proposes that a primarily linguistic approach to interpretation of the relevant rules should be adopted. In so doing, the book analyses the appropriate judicial role in an area of high levels of scientific and administrative complexity. The book provides a framework for interpretation of these offences. The key elements that ought to be included in this framework--the language of the provision, the harm tackled as drafted, regulatory context, explanatory notes and preamble, and finally, purpose in a broader sense--are considered in this book. Through this framework, a solution to the certainty problem is provided.
