The first book in the Body Finder series from Kimberly Derting is equal parts romance and mystery. Sixteen-year-old Violet is hiding two secrets. The first is her confusing new feelings for her childhood best friend Jay. The second is her unusual ability to sense the dead...and the people who killed them. Violet has never considered her morbid ability to be a gift, but when a serial killer begins terrorizing her small town,

Violet realizes she may be the only person who can stop him. Ever protective of her, Jay agrees to help Violet, and as they search, Violet realizes she isn't the only one whose emotions have changed. But as they fall in love, Violet is also getting closer and closer to discovering the killer...and becoming his prey herself. The Body Finder is the compulsive first book in the four-book Body Finder series by Kimberly Derting. *Flying Magazine* Meyer Distributing 2008

This is a book for tall people, those who relate to them, and anyone

interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things? And, as tall women might

be pondering, where
have all the tall,
dark, and handsome
men gone? Lastly,
what can be done
about all this?
These questions and
more will all be
answered by a tall
protagonist over
eight chapters:
Evolution, Scaling,
Spine,
Manufactured,
Ergonomics, Growth,
Longevity, and
Society.

I'll Keep You Safe

Meyer Distributing Friends since childhood, and lovers and business partners as adults, Niamh and Ruairidh are owners of a small Hebridean company, Ranish Tweed, that weaves its own very special version of Harris Tweed. Although it's a small company, their fabrics have become internationally sought-after as a niche brand in the world of fashion and haute couture. But the threads of their relationship are beginning to fray. As they prepare for an important showing at the Première Vision fabric fair, held in Paris every year, Niamh accuses Ruairidh of having an affair

with Irina, a Russian fashion designer they work with--a fight that ends with Ruairidh storming off and getting into Irina's car. Moments later, Niamh watches in horror as the car containing her life partner explodes in a ball of flame.

The New York Times bestselling work of undercover reportage from our sharpest and most original social critic, with a new foreword by Matthew Desmond, author of *Evicted* Millions of Americans work full time, year round, for poverty-level wages. In 1998, Barbara Ehrenreich decided to join them. She was inspired in part by the rhetoric surrounding welfare reform, which promised

that a job—any job—can be the ticket to a better life. But how does anyone survive, let alone prosper, on \$6 an hour? To find out, Ehrenreich left her home, took the cheapest lodgings she could find, and accepted whatever jobs she was offered. Moving from Florida to Maine to Minnesota, she worked as a waitress, a hotel maid, a cleaning woman, a nursing-home aide, and a Wal-Mart sales clerk. She lived in trailer parks and crumbling residential motels. Very quickly, she discovered that no job is truly "unskilled," that even the lowliest occupations require exhausting mental and muscular effort. She also learned that one job is not enough; you need at least two if

you int to live indoors. Nickel and Dimed reveals low-rent America in all its tenacity, anxiety, and surprising generosity—a land of Big Boxes, fast food, and a thousand desperate stratagems for survival. Read it for the smoldering clarity of Ehrenreich's perspective and for a rare view of how "prosperity" looks from the bottom. And now, in a new foreword, Matthew Desmond, author of *Evicted: Poverty and Profit in the American City*, explains why, twenty years on in America, Nickel and Dimed is more relevant than ever.
