Britain's Best Political Cartoons 2017 offers a pictorial whistle-stop tour of a year in which, among many other things, Brexit became a way of life, the general election that wasn't supposed to happen happened and the world became obsessed with 140-character messages from the US president. Celebrating the best drawings by our very finest cartoonists, it's a superbly sharp and witty record of an extraordinary twelve months, complete with scheming Russian presidents, militaristic North Korean leaders, and the occasional scary clown.

The Arthur of the North is the first book-length study of the Arthurian literature that was translated from French and Latin into

Old Norse-Icelandic in the thirteenth century, which has been preserved mostly in Icelandic manuscripts, and which in early modern times inspired the composition of narrative poems and chapbooks in Denmark, Iceland and Norway, chiefly of the Tristan legend. The importation of Arthurian literature in the North, primarily French romances and lais, is indebted largely to the efforts of King Hákon Hákonarson (r. 1217–63) of Norway, who commissioned the translation of Thomas de Bretagne's Tristan in 1226, and subsequently several Arthurian romances by Chrétien de Troyes and a number of Breton lais. The translations are unique in that the French metrical narratives were rendered in prose, the traditional form of narrative in the North. The book concludes with a chapter on Arthurian literature in the Rus' area, precisely East Slavic, with a focus on the Belarusian Trys'an.
