"Messages, Signs, and
Meanings can be used directly
in introductory courses in
semiotics, communications,
media, or culture studies.

Additionally, it can be used as
a complementary or
supplementary text in courses
dealing with cognate areas of
investigation (psychology,

mythology, education, literary
studies, anthropology,
linguistics). The text builds
upon what readers already
know intuitively about signs,
and then leads them to think
critically about the world in
which they live - a world
saturated with images of all
kinds that a basic knowledge of
semiotics can help filter and
deconstruct. The text also
provides opportunities for
readers to do "hands-on"
semiotics through the exercises
and questions for discussion
that accompany each chapter.
Biographical sketches of the
major figures in the field are

also included, as is a convenient
glossary of technical terms."

"The overall plan of the book is
to illustrate how message-

can be studied from the specific
vantage point of the discipline

also includes updated

focusing especially on how
meanings are now negotiated
through such channels as
