The Early-Middle Pleistocene transition (around 1.2 to 0.5 Ma) marks a profound shift in Earth's climate state. Low-amplitude 41 ka climate cycles, dominating the earlier part of the Pleistocene, gave way progressively to a 100 ka rhythm of increased amplitude that characterizes our present glacial-interglacial world. This volume assesses the biotic and physical response to this transition both on land and in the oceans: indeed it examines the very nature of Quaternary climate change. Milankovitch theory, palaeoceanography using isotopes and microfossils, marine organic geochemistry, tephrochronology, the record of loess and soil deposition, terrestrial vegetational change, and the migration and evolution of hominins as well as other large and small mammals, are all considered. These themes combine to explore the very origins of our present biota.

From memes to resumes, fairy tales to researched arguments, in a striking full-color visual design, The Bedford Book of Genres invites students to unpack how genres work in order to experiment with their own compositions. After capturing the imagination of instructors and students in its successful first edition, the second edition incorporates extensive reviewer feedback to better teach students the rhetorical analysis skills they need to read and compose in any situation. To start the text, the Guide now includes a new Part One that lays out the book's key concepts--rhetorical situation, the elements of a genre, and multimodal composing--and a substantially revised Part Two with examples arranged by academic, workplace, and public contexts. Throughout the text, Guided Readings provide opportunities to analyze the rhetorical situations and conventions of common public and academic genres, while Guided Process sections follow the decisions that five real students made as they worked in multiple genres and media. With a range of readings from short visual arguments to longer, more complex pieces, the Reader gives students a wealth of sources, models, and inspiration for their own compositions. Now available with Launchpad for The Bedford Book of Genres, the second edition offers a compelling digital option with a complete, interactive, assignable e-book.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

Common sense tells you that you would know if you were evil, but what about the freaking anti-christ? Quite ironically, my name is Faith, and up until a few days ago I was just a normal waitress working a dead end job just to get by. My life was going perfectly crappy just like everyone else, and my dumb ass had to go and screw it up looking for love. When a mysterious dating app installs itself onto my phone I cave and take the bait. Little do I know the four blind dates I'm matched with are actually the four horsemen of the apocalypse, and my life is turned upside down like the crosses they wear around their necks. I barely have enough time to process that angels and demons exist because every angel and their momma is descending from a corrupt heaven to kill me. Backed into a corner I'm left with two choices- try to plead my innocence to God and his army, or become the anti-christ they all think I am and build my own. Are good and evil really as black and white as they're trying to make them out to be?

Gain all of the techniques, teachings, tools, and methodologies required to be an effective first-time product manager. The overarching goal of this book is to help you understand the product manager role, give you concrete examples of what a product manager does, and build the foundational skill-set that will gear you towards a career in product management. To be an effective PM in the tech industry, you need to have a basic understanding of technology. In this book you'll get your feet wet by exploring the skills a PM needs in their toolset and cover enough ground to make you feel comfortable in a technical discussion. A PM is not expected to have the same level of depth or knowledge as a software engineer, but knowing enough to continue the conversation can be a benefit in your career in product management. A complete product manager will have a 360-degree understanding of user experience and how to craft beautiful products that are easy-to-use, with the end user in mind. You'll continue your journey with a walk through basic UX principles and even go through the process of building a simple set of UI frames for a mock app. Aside from the technical and design expertise, a PM needs to master the social aspects of the role. Acting as a bridge between engineering, marketing, and other teams can be difficult, and this book will dive into the business and soft skills of product management. After reading Product Management Essentials you will be one of a select few technically-capable PMs who can interface with management, stakeholders, customers, and the engineering team. What You Will Learn Gain the traits of a successful PM from industry PMs, VCs, and other professionals See the day-to-day responsibilities of a PM and how the role differs across tech companies Absorb the technical knowledge necessary to interface with engineers and estimate timelines Design basic mocks, high-fidelity wireframes, and fully polished user interfaces Create core documents and handle business interactions Who This Book Is For Individuals who are eyeing a transition into a PM role or have just entered a PM role at a new organization for the first time. They currently hold positions as a software engineer, marketing manager, UX designer, or data analyst and want to move away from a feature-focused view to a high-level strategic view of the product vision.

What goes out from you is always reflected back to you. If you cause something to happen, it will be reflected back to you equally. The Universal Mirror is an action of which there has to be an equal and opposite re-action The Universal Mirror is pure energy, a two fold light wave of energy which is an electromagnetic energy. The Universal Mirror is a reflection of the Creator and in fact is the Creator. We are reflections of Him and we are the Universal Mirror. This book is a reflection of the Creator and will mirror back to you what you may know and what you may not know. That is why it is a two fold light wave of energy What ever it is you do not like about someone, is because you are seeing something in them that is in you. You cannot recognize in me anything that is not in you. You can only recognize in me what is in you. If you take something, something will be taken from you. If you give something, it will be given back to you. What ever you see in another person, you are in reality seeing what is inside of your self. The Universal Mirror.
