Schools Cannot Do It Alone**

tells of Jamie Vollmer, businessman and attorney, as he travels through the land of public education. His encounters with blueberries, bell curves, and smelly eighth graders lead him to two critical discoveries. First, we have a systems problem, not a people problem. We must change the system to get the graduates we need. Second, we cannot touch the system without touching the culture of the surrounding town; everything that goes on inside a school is tied to local attitudes, values, traditions, and beliefs. Drawing on his work in hundreds of districts, Jamie offers teachers, administrators, board members, and their allies a practical program to secure the understanding, trust, permission, and support they need to change the system and increase student success.

In the twentieth century, large companies employing many workers formed the bedrock of the U.S. economy. Today, on the list of big business's priorities, sustaining the employer-worker relationship ranks far below building a devoted customer base and delivering value to investors. As David Weil's groundbreaking analysis shows, large corporations have shed their role as direct employers of the people responsible for their products, in favor of outsourcing work to small companies that compete fiercely with one another. The result has been declining wages, eroding benefits, inadequate health and safety protections, and ever-widening income inequality. From the perspectives of CEOs and investors, fissuring--splitting off functions

that were once managed internally--has been phenomenally successful. Despite giving up direct control to subcontractors and franchises, these large companies have figured out how to maintain the quality of brand-name products and services, without the cost of maintaining an expensive workforce. But from the perspective of workers, this strategy has meant stagnation in wages and benefits and a lower standard of living. Weil proposes ways to modernize regulatory policies so that employers can meet their obligations to workers while allowing companies to keep the beneficial aspects of this business strategy.

demographic, social, and health conditions for African Americans. Population-wide, the African American community has a higher mortality rate from cancer and diabetes than the rest of the population, a higher infant mortality rate, and a lower vaccination rate for influenza and pneumonia. The contributions to this comprehensive Handbook of African American Health uncover the specific demographic conditions of the African American population, and outline social interventions for both physical and mental health at the primary, secondary, and tertiary levels. The 26 contributions to this comprehensive volume cover interventions for a diverse range of health problems, including: -obesity and cardiovascular disease- diabetes-asthma and other respiratory diseases-

When Elizabeth Andes was found bound, stabbed, and strangled in her Ohio apartment in 1978, police and prosecutors decided within hours it was an open-and-shut case. Within days, Bob Young, a 23-year-old football player who'd found his college sweetheart's lifeless body on their bedroom floor, was charged with her murder. To this day, police and prosecutors still say they had the right guy—even though two juries, one criminal and one civil, disagreed, and Young walked away a free man. Beth's case went cold. Nearly four decades later, two Cincinnati reporters re-examined the murder and discovered that law enforcement ignored leads that might have uncovered who really killed Beth Andes. Centerburg might be your town. Grampa Hercules and his never-ending tall tales, Dulcy Dooner, the uncooperative citizen, unbusinesslike Uncle Ulysses and his friendly lunchroom, the flustered sheriff, the pompous judge—they are all as American as they come. But there's a subtle and delightful difference. In Centerburg, along with the routine of day-to-day living, the most preposterous things keep

happening. But nothing fazes Homer Price!

Ragweeds taller than fire ladders, music that sets a whole town dancing—he solves these problems calmly and efficiently.

Homer Price is a boy with a good supply of common sense—and ingenuity!

Homer's Grampa

Hercules is a delightful old rascal and his extravagant reminiscences of his youth are the starting point of many of the episodes. The chapter titles are as enticing as the chapters themselves: The Hide-a-Ride, Looking for Gold, Ever So Much More So, Experiment 13, Grampa Hercules and the Gravitty-Bitties, Pie and Punch and You-Know-Whats. Mr. McCloskey's characters have warmth and kindness and a

healthy curiosity; but they are not above a few minor faults and foibles. They are unmistakably alive. Like Mr. McCloskey himself, they are perpetually amused by the everyday hazards and discrepancies around them.

Despite long-term and ongoing efforts to close the achievement gap between disadvantaged and advantaged students, low-income students continue to perform at considerably lower levels than their higher-income peers in reading and mathematics. Research has shown that students' skills and knowledge often deteriorate during the summer months, with low-income students facing the largest losses. Instruction during the summer has the potential to

stop these losses and propel barriers by capitalizing on a range of funding sources, students toward higher achievement. A review of the literature on summer learning loss and summer learning programs, coupled with data from ongoing programs offered by districts and private providers across the United States, demonstrates the potential of summer programs to improve achievement as well as the challenges in creating and maintaining such programs. School districts and summer programming providers can benefit from the existing research and lessons learned by other programs in terms of developing strategies to maximize program effectiveness and quality, student participation, and strategic partnerships and funding. Recommendations for providers and policymakers address ways to mitigate

engaging in long-term planning to ensure adequate attendance and hiring, and demonstrating positive student outcomes.

A thoroughly entertaining and darkly humorous roundup of history's notorious but often forgotten female con artists and their bold, outrageous scams—by the acclaimed author of *Lady Killers*. From Elizabeth Holmes and Anna Delvey to Frank Abagnale and Charles Ponzi, audacious scams and charismatic scammers continue to intrigue us as a culture. As Tori Telfer reveals in *Confident Women*, the art of the con has a long and venerable tradition, and its female practitioners are some of the best—or worst. In the 1700s in Paris, Jeanne de Saint-Rémy scammed the royal jewelers out of a

necklace made from six hundred and forty-seven diamonds by pretending she was best friends with Queen Marie Antoinette. In the mid-1800s, sisters Kate and Maggie Fox began pretending they could speak to spirits and accidentally started a religious movement that was soon crawling with female con artists. A gal calling herself Loreta Janeta Velasquez claimed to be a soldier and convinced people she worked for the Confederacy—or the Union, depending on who she was talking to. Meanwhile, Cassie Chadwick was forging paperwork and getting banks to loan her upwards of \$40,000 by telling people she was Andrew Carnegie’s illegitimate daughter. In the 1900s, a 40something woman named Margaret Lydia Burton embezzled money all over the country and stole upwards of forty prized show dogs, while a few decades later, a teenager named Roxie Ann Rice scammed the entire NFL. And since the death of the

Romanovs, women claiming to be Anastasia have been selling their stories to magazines. What about today? Spoiler alert: these “artists” are still conning. Confident Women asks the provocative question: Where does chutzpah intersect with a uniquely female pathology—and how were these notorious women able to so spectacularly dupe and swindle their victims?

Over the past decade a rising chorus of critics - from William Bennett to Allan Bloom - has decried the supposedly dire state of our public schools. Kids aren't learning what they should, violence and chaos reign in the classroom, and bureaucracy strangles attempts at reform. But how much of that grim image is really true? In *The Manufactured Crisis*, two prominent scholars, prize-winning educational

psychologist David C.

Berliner and leading social psychologist Bruce J.

Biddle, fight back with the good news. They debunk a whole series of familiar but untrue statistics about public schools - that SAT scores have been dropping, when for many groups they are in fact rising; that illiteracy is up, when in fact the numbers have been skewed because schools are now educating the traditionally disenfranchised in ever larger numbers; that investments in public education do not pay off when, in fact, they lead to greater student achievements and life earnings; that private schools are inherently better than public schools when, in fact, the evidence does not support this charge. Berliner and Biddle tear through these and other sensational myths to give the reader an

honest look at public education in America and the misguided, often tragic proposals that critics have urged for correcting these fictive problems. In addition, they expose and offer solutions to the real problems American public schools face today, schools that continue to provide an increasingly diverse citizenry with the opportunity to better their lives.
